

# Bringing Hybrid Cloud to Universal Core Banking

## ABOUT SILVERLAKE AXIS

Silverlake Axis is a global financial technology vendor specializing in core banking systems. Since its establishment in 1989, the company has maintained a 100% implementation success rate in core and core-adjacent implementations, making it the premier partner for enterprise-wide transformations among financial institutions. Today, nearly half of the 20 largest banks in South-East Asia run on Silverlake Axis' flagship financial solutions, with three of the top five ASEAN regional financial institutions being powered by its universal banking solution, SIBS.

"Given mission-critical requirements, the Silverlake Axis and IBM Power Systems combination stood neck and shoulder above the rest, as testament from as many as 50 banks in the region that are enjoying the strategic alliance of SIBS sitting on a robust and scalable IBM AS400 (Power System) platform."

- IDC Financial Insights

## WHAT WE OFFER

The Silverlake Integrated Banking Solution (SIBS) is designed as a core banking system for universal banking businesses. Built, tested, and refined from over 30 years of global partnerships, SIBS supports an exhaustive array of financial products, ranging from loans and deposits to payments and securities.

SIBS's rules-assisted product configuration and process automation allows banks to rapidly deploy customized offerings without any recoding. These robust logics extend to our core-adjacent solutions as well, including pricing, compliance and reporting, fraud monitoring, and enterprise data visualization.

Through our partnership with Microsoft Azure, SIBS is now available for hybrid Cloud deployment. Our newest solution combines the robustness of our IBM System i heritage with Azure's open platform scalability to create a core banking suite that is both highly resilient and futureproof. Microsoft's commitment to open source also allows SIBS to coexist with a rich ecosystem of third-party applications, allowing you to continuously innovate and

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
