

Credivera

Accelerated Returns with Verifiable Credentials

Credivera enables you to control, manage and share digital credentials in real-time. Protect your reputation, improve your performance and enhance value for your workers.

Benefits for HR.

- ✓ **Streamline** onboarding.
67% decrease in time spent validating credentials (a process previously taking up to 2 weeks). Savings of \$3,000 / year / hire, avoiding retraining or doubling-up on existing training.
- ✓ **Improve** accuracy.
Multiple candidate records stored in multiple systems. Going from 20% to 100% verified records for all employees/candidates. For example, an average field worker holds up to 42 different credentials.
- ✓ **Prevent** fraud.
100% elimination of fraudulent credentials with real-time verification, up from the current market average of 59% for education. Avoid negative reputational effects (news, word of mouth).
- ✓ **Save** on audits.
4 hours / site / month in time savings spent on audits reduced to 0. COR audit for a large construction company reduced from 3 weeks per project / site to 15 minutes. Only audit non-compliant workers.

Verify at source. Empower knowledge.

“ Credivera specializes in providing digital identity solutions to various industries for new applicants through to end of career. We realize 100% candidate accuracy with the Credivera solution.

Rae Shungur - Director Strategic Partnerships
Recruitment Partners Inc.

Benefits for Operations

- ✓ **Accelerate time on tools.**
70% reduction in time spent verifying workers before the start of every shift (site ready).
- ✓ **Know your capacity.**
100% workforce planning accuracy. You know who is available to fill open roles on new projects at a glance.
- ✓ **Improve utilization.**
Eliminate bi-weekly senior management planning meetings, realizing a savings of 8-10 hours for project deployment.
- ✓ **Enhance billing accuracy.**
Know who is on site and their seniority, verify contractor billing against negotiated hourly rates and individuals on site.
- ✓ **Shorten time to bid.**
Proposal write-ups and resource planning for new projects reduced from days to minutes.

Benefits for IT

- ✓ **Simplify on/offboarding.**
Reduce commissioning delays between HR and IT for new employees/contractors from weeks to real-time.
- ✓ **Improve utilization.**
Give each worker a unique identifier that eliminates duplicate records when a worker is rehired for a new project or site.
- ✓ **Enhance compliance.**
Eliminate 100% of the risk linked to deploying untrained workers. Lack of training is cited as a major contributing factor for workplace injuries in the [NSA Work to Zero 2020 report](#).
- ✓ **Advance security controls.**
Eliminate 100% of unauthorized site access for new workers. Role-based access controls are defined by externally obtained credentials in addition to internally issued identity/badges.

About us

Credivera was founded by global leaders in enterprise network solutions, data security, cybersecurity, e-commerce, fintech, privacy, and blockchain technology. For over 20 years, the team has had direct experience in worksite access and backgrounds for high-risk profile workers in North America.
