

Bringoz Platform

Bringoz is a SaaS-based delivery logistics platform that provides shippers and carriers with end-to-end, scalable delivery infrastructure, enabling them to compete in today's demanding landscape

Centralized System, Management Made Super Simple

Consolidate your operations into one intuitive access point providing your team with all the information they need to track, monitor, and manage your logistics.

Automation

Automate manual actions throughout the entire logistics process. Manage your dispatch workflows with constraint-based automation, optimized routes and flexible planning options.

Tracking and Visibility

Track packages, routes, drivers and customer satisfaction in real-time; notify customers with the most up-to-date delivery information.

Create Your Own Flexible Delivery Network

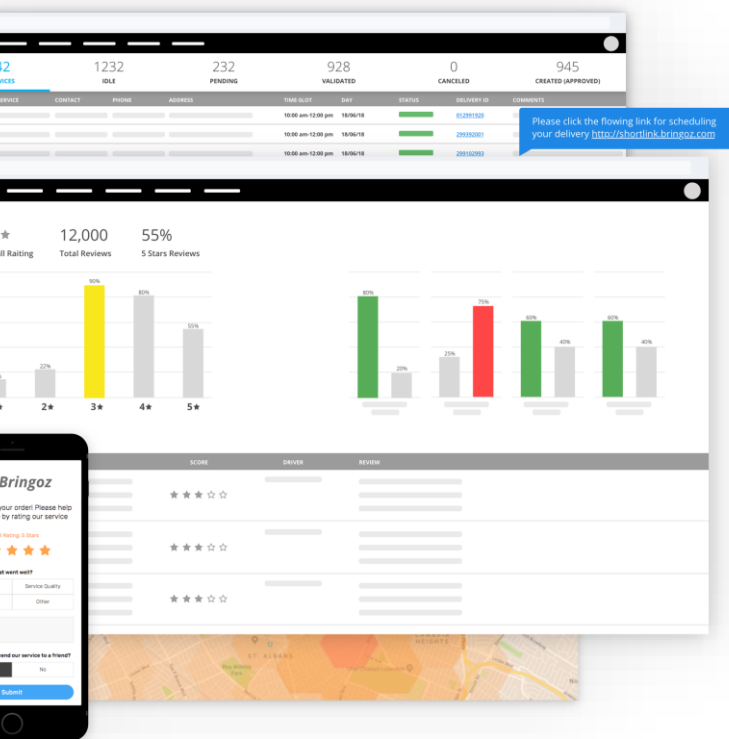

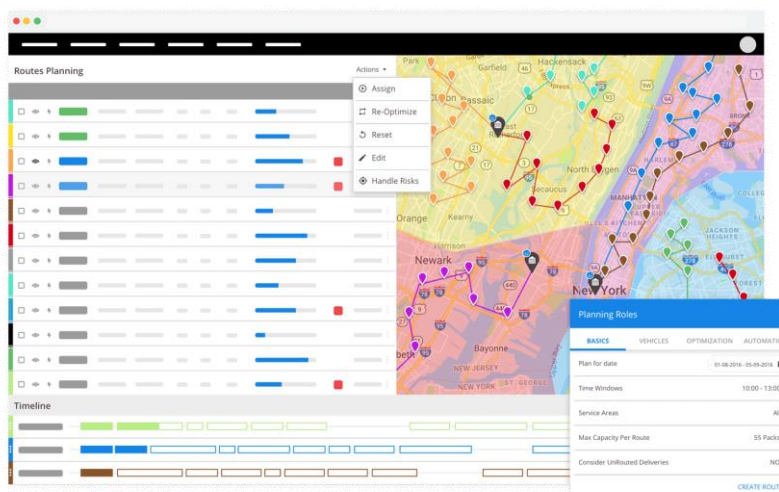

Combine existing assets with independent carriers and crowdsourced options, easily adaptable according to your business needs.

Insights to Actions

Gain immediate insights into your delivery operations, eliminate risks and reduce costs with real-time actionable alerts.

Organizations and Enterprise

Support your entire organization – multiple sites, hubs, stores, and any related logistics activity.

Customer-Centric Focus

Go beyond traditional methods of communication, provide a superior user experience to increase loyalty & engagement, stay connected with your customers.

When and Where

Coordinate deliveries efficiently with flexible scheduling options, let your customer decide when and where.

Real-Time Tracking

Keep your customer updated throughout the entire delivery process, send automatic updates on their order's progress.

Real-Time Satisfaction Insights

Stay informed and gain insights into customer satisfaction with customer surveys, service ratings, and driver scoring.

Unified for Branding

Customize the product to match your brand and create a personalized product.

Customer Support

Support your customers from one access point with real-time information received from the operations, deliveries, returns, drivers, and customers.

Analytics & Reports

You can't manage what you don't see.

Dashboard

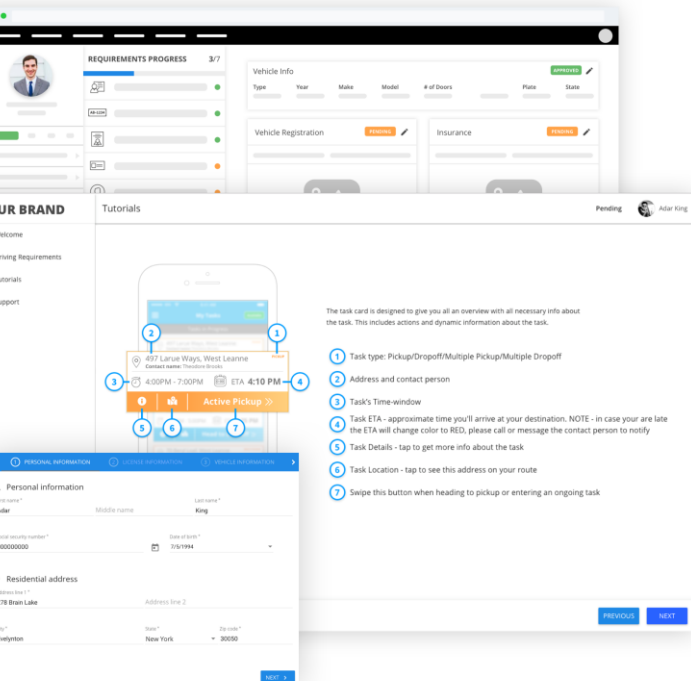

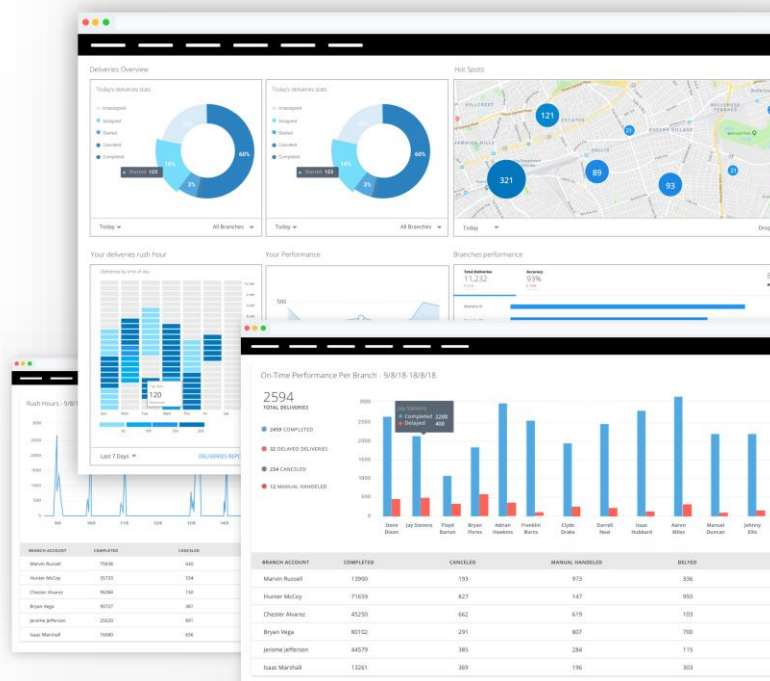

Real-time overview of your entire delivery network to track, monitor and analyze all of your delivery operations in one place.

Risk Management

Identify and eliminate risks in real-time by managing delays and incomplete tasks.

Reports

Gain valuable insights and analysis for your operations to maximize assets and lower OPEX.

Driver Recruitment & Onboarding

Recruit and build an elastic fleet – employees, Independent Contractors, and Crowdsourced Drivers. Streamline and manage the entire Driver recruitment process including screening, compliance, and training, to easily recruit drivers and build a robust delivery operation.
