

intellecom helps German school move to remote learning

Schools operate under strict government budgets. In addition, the hardware they deploy must be as simple to use as possible. The Freie Evangelische Schule (FES) in Lörrach, Germany teaches more than 1,000 students. When the COVID-19 pandemic struck in 2020, the school suddenly needed a way to securely provision its students and faculty for remote learning while remaining

compliant and staying within budget. FES Schule turned to intellecom to come up with an approach that enabled the school to easily secure and manage all of its devices centrally by using Microsoft Intune.

Products and Services: Microsoft 365, Teams, Intune, Autopilot

intellecom, FES Lörrach, & Microsoft 365, Intune, Autopilot, and Teams

Customer Challenges

The Freie Evangelische Schule (FES), a Protestant private school in Lörrach, teaches more than 1,000 students. With the onset of the COVID-19 pandemic in 2020, FES Lörrach was forced to confront a new 100-percent homeschooling scenario for both its students and teachers. The institution needed a central solution that would enable it to manage the notebooks it distributed and provide all of its lesson content on a central platform—and it needed it quickly.

Partner Solution

By leveraging existing Microsoft licenses, intelcom's modern desktop provisioning and management approach enabled FES Lörrach to use Microsoft Intune as a central administration tool for managing and maintaining the devices it uses in homeschooling. Microsoft Autopilot made it possible to ensure that the device provisioning process for students and teachers was quick and easy.

Customer Benefits

Through the use of Microsoft cloud-based management tools, all FES Lörrach students are able to take part in lessons via their mobile devices, and they have worked without restrictions starting from the first lockdown. The school now also easily secures and manages all of its devices centrally through Intune.

The fast provisioning of devices via Autopilot enabled flexible distribution of protected notebooks to students and teachers.

Students and faculty now work with the latest Microsoft Surface devices.

Microsoft 365 licensing allows teachers to conduct lessons and easily share documents with their students via Microsoft Teams.
