

# Site360

## RISK MANAGEMENT FOR THE RETAIL SECTOR

### **Site360 is a cloud-based site optimisation platform for the retail industry.**

The retail industry is characterised by the continuous flow and movement of people through the supply chain, and its numerous logistics and retail locations. Each location is constantly welcoming visitors, often with little or no onsite supervision, and potentially with no previous experience of being there.

Every week you have numerous contactors conducting high risk tasks across your store network. Ensuring they have the correct licenses, insurances & a current induction to operate safely within your stores is critical. SITE360 enables you to verify all business licences & insurances of EVERY individual at EVERY visit. You are also able to digitally verify the arrival time and departure time on every work order accurately, this ensures you only pay for what work has been conducted.

### **NO HARDWARE—NO SET UP COSTS**

**You wouldn't let just anyone into your home. So why is your workplace any different?**

## TAKE CONTROL OF YOUR COSTS!

### Site360 has a proven track record of supporting retailers to

- Save time through our seamless automated on-boarding platform our workflows manage EVERYTHING for you
- Capture visit data with our secure geo-location and geo-fence technology provides you with 100% accuracy of every visitor across all of your stores
- Minimise safety risks and create safer stores by improving safety communication to contractors and visitors
- Manage the effectiveness and invoice verification of your contractors through electronic work orders SAVE up to 30% of your annual costs
- Replace all paper based reporting—site audits, safety audits, saves time and delivers accurate information for your business.

*"Site360 is enabling us to be a data-driven business. We're gathering, processing, and accessing data to make much better decisions and reduce risk throughout the organisation.*

**Woolworths Group Pty Ltd**

**You wouldn't let just anyone into your home. So why is your workplace any different?**

**"With a 360° view of your business...  
you get complete inSITE while they're onSITE."**

### **Ensure the safety of everyone on your sites**

The financial, reputational, and operational impact of having an accident on site is too damaging, so you need to ensure the safe movement of people through your locations.

### **Manageability and control of contractors**

With more dependence on an itinerant workforce, the retail sector needs a robust system in place to monitor and manage their operations, report on who's done training, who has certification, and who's completed check-ins.

Improve your contractor and supplier invoice verification and confirmation with accurate data.

### **Regulation and compliance**

With your visitors having a better understanding of their responsibilities and obligations while they're in your different locations, they can be more responsible for their own actions.

This enables you to manage your regulation and compliance obligations with more certainty.

### **Identify where you can improve performance**

By gathering data from multiple sources, Site360 operates as a processing platform enabling you to take actionable insights and make better decisions from your data.

This creates a more nimble, agile, and responsive organisation, which drives profitability and growth

**You wouldn't let just anyone into  
your home. So why is your  
workplace any different?**

# DATA DASHBOARD AND COMPLIANCE

Site360's dynamic dashboard reporting provides live data insights based on geographical and hierarchical structure. This interactive reporting tool allows administrators to select a site, date, company, and even an individual to drill down to show site visit time, who did they visit, what was the purpose, time duration, site/company notifications and visit history. These insights will provide administrators with greater knowledge to remotely validate visits, compliance, trading expectations, and contractor management.
