

Kyndryl Consult Risk and Compliance

Managing risk and compliance is a key component of achieving security and resiliency. It is essential to help your organization manage data security and compliance needs.

Introduction

Kyndryl Consult Risk and Compliance helps organizations assess and manage compliance across their multi-cloud environment.

Highlights

The Kyndryl Consult Risk and Compliance service simplifies compliance and helps reduce risks.

- Detailed step-by-step guidance of Kyndryl's recommended improvement actions help customers comply with the standards and regulations that are most relevant to their organization.
- Workflow capabilities help customers efficiently complete their risk assessments through a single tool.

Kyndryl's Point of View

The traditional approach of performing manual assessments does not provide the flexibility required for digital transformation and cloud adoption. Kyndryl Consult Risk and Compliance helps customers manage their risk and compliance postures when they have complex environments and have multiple compliance requirements. Kyndryl Consult Risk and Compliance also assists enterprises in establishing and advancing their data privacy program's maturity level. It achieves this by operationalizing risk and compliance processes and practices, supporting privacy by design, meeting compliance requirements, and initiating auditable workflows. This helps customers innovate more quickly and enables them to focus on their core business.

After conducting the assessment, the customer will gain insightful clarity regarding their existing risk and compliance maturity. This assessment provides a holistic view of their compliance posture, highlighting any noteworthy gaps that require attention. Additionally, the assessment report will offer targeted recommendations to guide effective remediation efforts.

Kyndryl Consult Risk and Compliance

Service Overview

The Kyndryl Consult Risk and Compliance service can help you throughout your compliance journey, from taking inventory of your data protection risks to managing the complexities of implementing controls, staying current with regulations and certifications, reporting to auditors, and evaluating compliance with industry and regional regulations. Ready-to-use over 360 regulatory templates contain the necessary controls and improvement actions for completing the assessment. Custom assessments can also be created. Kyndryl's expert consultants will recommend the most relevant assessments for your organization and advise on which policies and operational procedures to implement to limit your compliance risk.

Assessment Engagement includes:

- Assessment workshop
- Quick-start approach
- Automated assessment and consultancy against over 360 regulatory templates
- Multi-services assessment
- Rapid execution leveraging the extensive skills and global pool of resources
- Project management
