

Accelerate your digital journey. With BILFINGER DIGITAL NEXT.

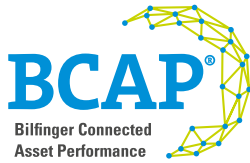

BCAP®: From Data to Value

With combined competences of software development and domain knowledge, we create insights of your isolated data, define actions and implement improvements specific for your business by using BCAP®. By providing the platform and driving improvements together with you, we increase business value top- and bottom line.

ISOLATED DATA

- ENGINEERING
- OPERATION
- MAINTENANCE
- ENERGY
- EXTERNAL DATA

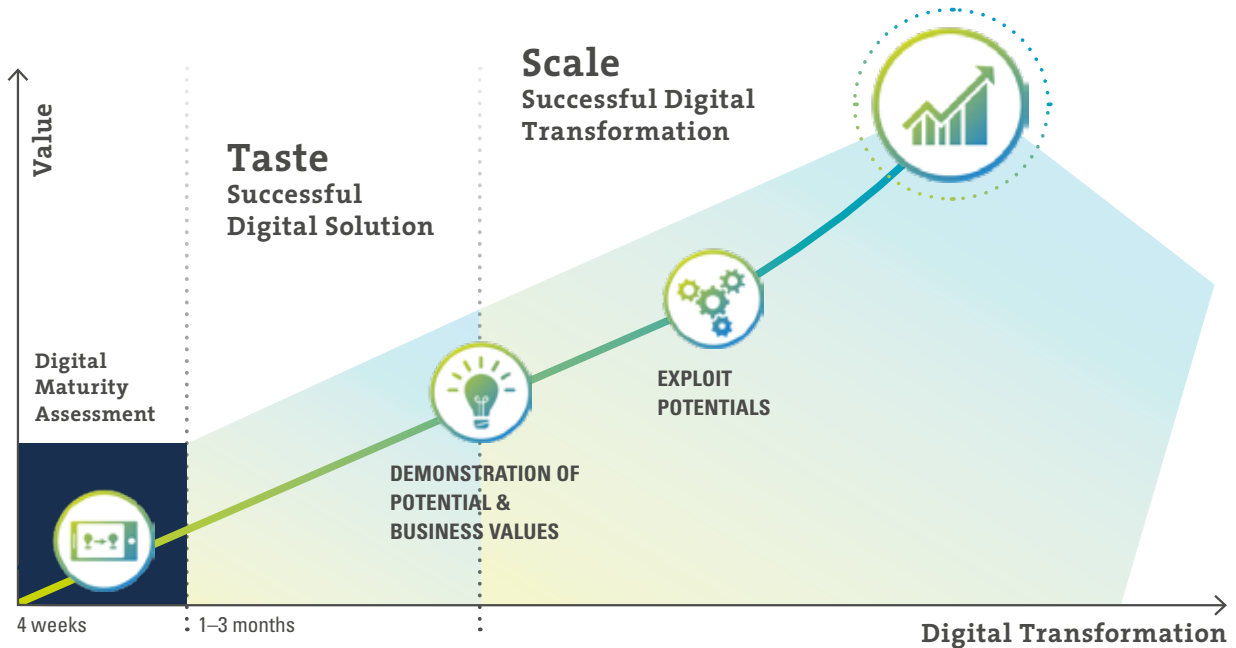

BCAP® provides a portfolio of standard applications as well as tailor-made AI solutions utilizing our industry and data science know-how.

BUSINESS VALUE

OEE IMPROVEMENT	HSE IMPROVEMENT
COST REDUCTION	ASSET INTEGRITY IMPROVEMENT
WORKFORCE ENABLEMENT	

Our approach: We make your digital transformation pay for itself ... fast, easy, safe

We accelerate your digital journey within only 1-3 month. In a first digital assessment, we analyze your digital status and identify your quick wins. In the taste phase, we offer both plug and play solutions with operational implementation including technical connectivity and customized applications that solve specific operational problems. In the scale phase, we exploit the full digital potential of your plant to gain value.

Accelerate your digital journey. With BILFINGER DIGITAL NEXT.

Our solutions

Collect and process asset data to improve OEE and reduce costs

With the **BCAP**® you are able to access predefined software and service solutions on demand. Unlock hidden insights from isolated data by using the latest technology. With remote consultancy from our domain- and data science experts, we will add value to these insights. With **BCAP**® your data is secured end-to-end based on leading industry standards.

Creation of learning videos by colleagues for colleagues

Industrial Tube enables expertise to be shared within the company via videos – quickly, easily and across facilities and plants. In the app, individual work steps of an activity are filmed with simple step-by-step instructions. No previous knowledge is needed. The videos can be found on the customer-specific Industrial Tube web portal and shared with colleagues.

PIDGraph

The smart way to digitize engineering documentation

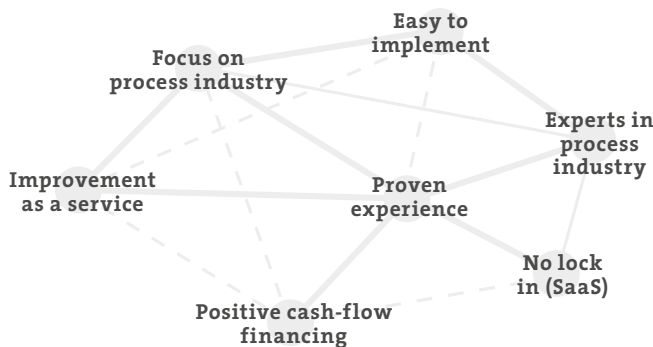

PIDGraph converts your analogue P&IDs into an intelligent format applying artificial intelligence. This solution is up to 50% cheaper than current methods. PIDGraphML contains all meta data and can be imported into 3rd party CAE systems or others. Always have the right information in place, easy collaboration with subcontractors and less search time needed.

Why BILFINGER DIGITAL NEXT?

Fast, easy, safe!

BILFINGER DIGITAL NEXT is the corporate start-up driving the **digital transformation** in the **process industry**.

The combination of **data experts** with **industrial expertise** supported by strong partners leads to our solution portfolio: **BCAP**®.

40+ employees

Located in Heidelberg

20+ Solutions

Global customers

Our domain knowledge in the following industries:

Chemicals & Petrochemicals | Oil & Gas | Energy & Utilities | Pharma & Biopharma | Metallurgy | Cement
