

CloudBlaze

Rawcubes' CloudBlaze, an Azure-based configuration driven data ingestion platform, offers automation and on-demand number of parallel migrations, drastically reducing time, cost, and risk associated with digital transformation to cloud.

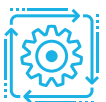

Resource Provisioning

CloudBlaze supports dynamic provisioning of cloud infrastructure that allows the resource lifecycle to become shorter and part of the application lifecycle.

Data Transformation

CloudBlaze provides a clear process to define transformation activities to be carried out before the data is ingested onto the target system.

Deployment Automation

CloudBlaze's deployment is fully automated and supports continuous delivery and production deployments.

Schema Automation

CloudBlaze's ability to auto collect the source schema decreases the risk of user error and accelerates the migration process.

Centralized Audit Balance & Control

CloudBlaze's uses Azure Monitoring Service to track & monitor activities across layers.

Solutions

Cloud Computing

Our consultants wear multiple hats from the inception of project for "Strategy and Assessment" to "Cloud Migration/Enhancement" and finally providing "Cloud Solution".

Big Data and Analytics

Our experts have extensive experience in architecting, building, deploying and supporting robust, open source Hadoop and NoSQL ecosystems that can be scaled to meet your data needs.

AI & Machine Learning

We create Machine Learning & Artificial Intelligence based solutions to derive data-driven decisions at a speed demanded by businesses.

Digital Transformation

Rawcubes' Digital Transformation solutions and services help companies in identifying gaps in strategy therefore offering key insights to drive digital strategy. We offer digital transformation consulting services by leveraging a wide spectrum of digital technologies.

Services

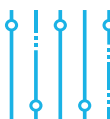

Fraud Analytics

Detect, prevent, and manage fraud for the insurance industry through statistical, machine learning, and artificial intelligence techniques.

Risk Engineering

Customized catastrophe modelling using latest machine learning techniques allowing insurers to evaluate and manage catastrophe property risk with great level of accuracy.

Command & Control

Integrated command and control solution intelligently enhances incident management by automating workflows and data retrieval to help stakeholders act on alerts with speed.

A modern self-service data management platform, with built-in domain intelligence, to prepare your data for analytics

Built on the principles of standard Domain Vocabulary, Datablaze helps organizations to speed up the data acquisition and data curation resulting in intelligent implementation of domain-centric data lake.

Data Acquisition

Ingest any form of data into Data store.

Consumption Zone

Pre-built models using Custom Data Model (CDM) and Standard Data Model (SDM).

Domain Taxonomy Builder

Drag and drop based taxonomical view of business units and departments.

Augmented Data Discovery

Self-service data set creation enabled for data scientists and citizen data scientists.

Audit, Balance and Control (AB&C)

All activities are tracked and monitored into provenance repository allowing centralized auditing of data lineage.

Datablaze

Turbocharge Your Digital Adoption

We are on a mission to help businesses modernize their data by leveraging Rawcubes' data management platforms, pre-built domain taxonomies, and analytical models to enable better business insights
