

Microsoft Azure for SAP® Solutions by T-Systems

Test SAP S/4HANA® applications cost-effectively and without risk by choosing Microsoft Azure

Just quickly and simply ramp up your resources for better performance, test systems, accelerate projects, and turbocharge your analytics with SAP S/4HANA.

With T-Systems Public Cloud for SAP Solutions, you can use SAP applications flexibly and at any time.

A selection of SAP applications are available as fully functional appliances – complete ready-to-go solutions, not stand-alone components.

Your Benefits

- Rapid provisioning of leading SAP applications
- Fully functional SAP appliances for SAP HANA, SAP S/4HANA, etc. on your preferred public cloud
- Activate/deactivate at any time
- Combinable with Microsoft Azure
- Outstanding quality and reliability, backed by the latest SAP-certified technology
- Compensation of Jump Start consulting expenses in case of later migration to a productive system
- No additional license costs for up to 90 days

Test SAP S/4HANA® cost-effectively and without risk by choosing from three value-added Jump Start Editions

In order to try out the new opportunities for process optimization and digitization, T-Systems offers latest SAP S/4HANA software on public cloud for test and demonstration purposes and also as a perfect supplement for short-term requirements.

- The **Jump Start Basic Edition** offers prepared SAP application templates, such as SAP S/4HANA 1909. After provision on Microsoft Azure, you can use the system immediately and configure your proof-of-concept. During the managed operation phase, available for 90 days, you can evaluate your test system.
- With the **Jump Start Plus Edition** you get a completely pre-configured SAP S/4HANA application, for example the Fully Activated Appliance and benefit from individual consulting packages. The system already contains integrated master and transaction data as a test environment. This allows to try out typical SAP S/4HANA use cases. A common definition of your individual SAP S/4HANA proof-of-concept system, system handover and results workshop included. For questions during the evaluation phase, we support you with "Assistance on Demand".
- In the **Jump Start Full Edition** you also benefit from the integration of an Adobe Document Service System.

Managed Services for SAP Solutions on Microsoft Azure including know-how of an experienced and SAP-certified partner.
