

Behavioral Data Infrastructure

driven by AI

Foundation models like ChatGPT, GPT-3, Dall-E 2, StableDiffusion have revolutionized Text and Image processing. A single large model trained on massive datasets can replace thousands of specialized models.

For the first time thanks to Synerise models you can apply the same principle to behavioral data.

Prepared 2023

Synerise

Leader in Behavioral Modelling Science

**We improve
customer
experience
in over 150
countries**

“Dailymotion has applied Synerise EMDE to personalize video recommendations in native applications, leading to improved relevance and catalog coverage.”

What we do?

From data to human needs

“**Synerise platform** is able to **track every event, across every channel**: whether it's mobile, it's web, physical presence. All of that is signal that's being **continuously collected, processed**, and then in turn **AI is being applied, workflows are being applied to drive the experience**”

Satya Nadella

CEO of Microsoft

SYNERISE

Synerise is among world's top AI powerhouses

International AI competitions prove that Synerise developed a world-class technology

Organizer	Competition name	Description of the challenge	1 st Prize	2 nd Prize	3 rd Prize
KDD2021	ACM KDD Cup Stanford OGB-LSC 2021	Predict the subject of scientific publications on the basis of edges contained in the heterogeneous graph of papers, citations, authors and scientific institutions.			SYNERISE
Booking.com	ACM WSDM Booking.com Data Challenge 2021	Provide the best suggestion for the next trip most likely to be bought by a booking.com customer based on millions of real, anonymized bookings of existing clients		SYNERISE	Team Dasou
	ACM RecSys Twitter Challenge 2021	Based on 1 billion historical tweets predict 4 possible actions (likes, retweet, comment, retweet with comment) of the next tweet provided in a random language		SYNERISE	layer6
Rakuten	SIGIR eCom Rakuten Challenge 2020	Identify the images of a huge data base of products without being given pairing of descriptions and images	SYNERISE	Undisclosed	 Rakuten Institute of Technology

And defeated inter alia:

We are solving AI scientific problems worldwide

Our tech & science achievements are shaping the platform we created

“Winners of the OGB-LSC graph machine learning challenge have just been announced [...] Congratulations to the winning teams from @BaiduResearch, @DeepMind, @Synerise...”

Jure Leskovec  @jure

Professor of #computerscience @Stanford, Chief Scientist @Pinterest

Stanford

“One of the hottest AI research fields”

OGB-LSC challenge mentioned as an AI benchmark in prominent **State of the AI report:**

<https://www.stateof.ai>

Our science achievements are shaping the platform we created

We believe in brave vision of computer science, which is always based on meritocracy

We built a mission-critical platform based on three pillars

Delivering excellent ROI with less than 3 months payback thanks to scientifically proven solutions

Ability To Absorb & Process
Heterogeneous Information

**How fast and at what scale
are you doing it?**

Terrarium Proprietary Database Engine

Column & row-oriented real-time behavioural database engine built from scratch for heterogeneous multi-modal data Ingestion

Ability to Analyse, Understand,
Infer & Make Decisions

**How deeply, precisely and effectively
can you analyze information to get
insights and make decisions?**

Automatic Behavioral Modeling & Analytics

Generalized behavioral modeling suite with feature store

Ability to Act, Experiment
& Learn in Real Time

**How do you use information to act,
learn and optimize your behaviour?**

Self-Service Workflow Automation & ML Execution

Self-service, low code & automation platform with reusable components for developers, clients & partners

Terrarium_

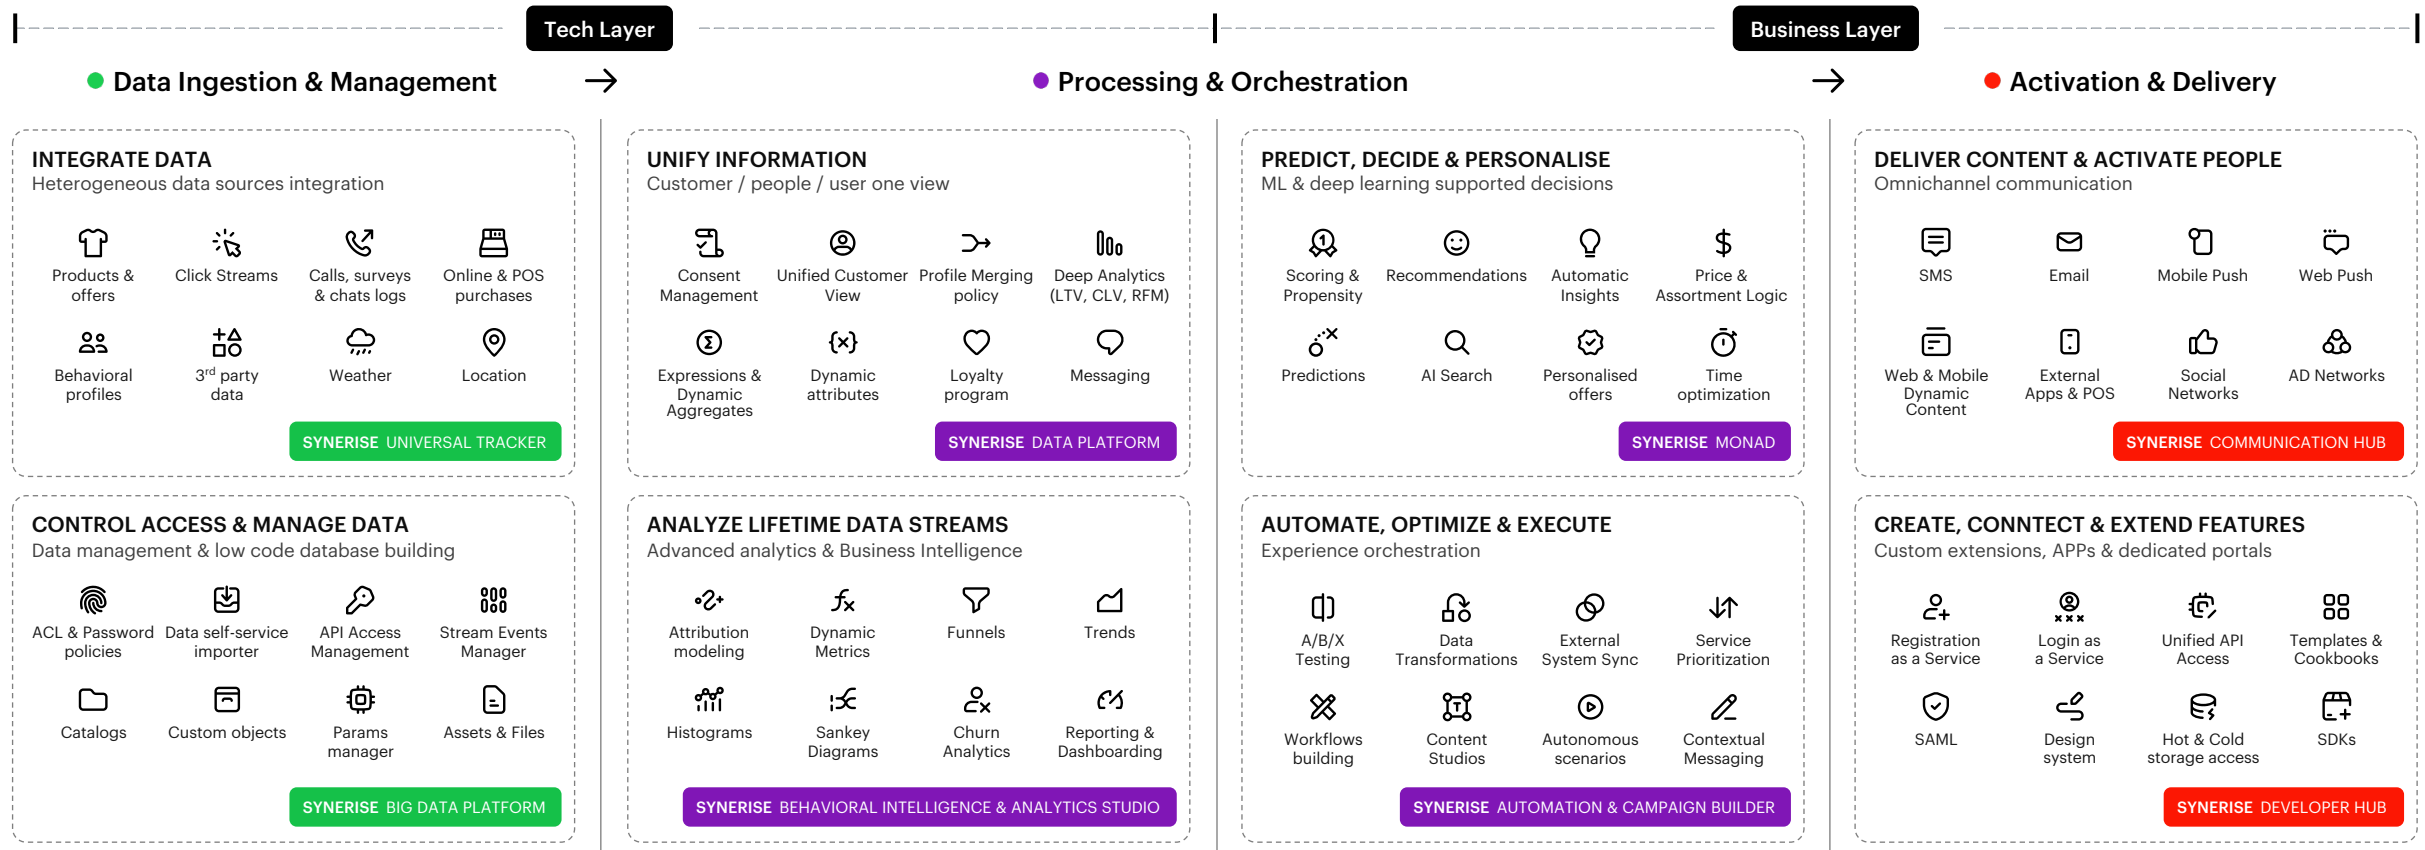

**API-first platform
open for extensions
with Design UI System**

We created an end-to-end experience & continuous intelligence framework

Connecting modern data collection, processing methods & analytics with AI-driven business scenarios execution

Synerise Experience Framework

Synerise Terrarium Database – Real-Time One Stop Data Collection, Analytics & Execution Engine

PRIVATE CLOUD

ON-PREMISE

Concept used by leaders

AI/Big Data frameworks

"We are currently using [Synerise] EMDE¹ for generating candidates to facilitate downstream recommendation systems.

It generates recommendations using density-based rich customer representation. It allows us to trace **customer lookalikes** ('People Like You') to find similar users with similar cuisine/taste preferences as well as price affinity. We used [Synerise] Cleora for customer-restaurants graph data [...] And to our delight, the embedding generation was superfast (i.e <5 minutes). For context, do remember that GraphSAGE took ~20hours for the same data in the NCR region. **Cleora + EMDE gives us a generalised framework for recommendations** [...] We are exploring ways to use it in other applications such as search ranking, dish recommendations, etc. "

zomato

Data Science Team

[Read more](#)

Zomato is an multinational restaurant aggregator and food delivery company founded 2008 owned inter alia by Uber and AliPay. Zomato provides information, menus and user-reviews of restaurants as well as food delivery options from partner restaurants in select cities. The service is available in 24 countries and in more than 10,000 cities. In financial year 2021, the average monthly active users for Zomato were 32.1 million users.

[1] EMDE & Cleora are unique algorithms created from scratch by the Monad team and forming part of Monad project.

Zabka - Case Study

Key Synerise Experience Tools Implemented:

- Digital wallet with flexible loyalty program
- Headless Experience API for mobile APP
- Authorization as a service (Auth)
- Marketing Automation & Customer Intelligence
- AI Predictions & Recommendations
- AI Personalisation
- AI Scoring
- AI Promotion Engine
- Real-Time Online & Offline Events Tracking
- Real-Time Decision Management
- Retail media analytics with real time reporting

Video

We offer fast & transparent pricing & implementation model

Promoting individual approach for each customer and different deployment models

A Competitive Pricing Model

- 1 **Pay-As-You-Go** for real consumption of the platform only
- 2 **No CAPEX** required (no charges for subscriptions, entry-fees, etc.)
- 3 **Transparent** value-for-money based pricing mechanism (more revenue & usage – more engagement)

A Modern Implementation Model

- 1 **Fast deployment** in 1-2 weeks without IT dependency
- 2 **Integrates on top** of existing legacy software or replacing it
- 3 **Data privacy & security** compliant (full GDPR compliance)

One platform = thousands of use cases

All in one self-service platform for building exceptional experiences
