## Choose Any Combination of Mobile Archiving Methods for BYOD and Enterprise Phones

### Network Archiver

- Messages and calls are captured directly from the mobile carrier network
- The copy of the message is sent to the TeleMessage server for routing to company archive
- Can work for legacy phones. Enterprise only, not for BYOD
- No App necessary. Call recording capability is dependant on carrier's network.

### Android Archiver

- A lightweight agent is installed on the employee's Android device
- A copy of all mobile SMS / MMS and call recordings is captured on the mobile phone
- The copy of the message is sent to the TeleMessage server for routing to company archive
- Works in the background without any user intervention

### Enterprise Number Archiver

- Employee installs the TeleMessage app on their mobile phone
- A secondary enterprise number is provided to the employee and associated with the mobile app
- Messages and calls sent/received using the enterprise number arrive at the app and are recorded
- App users can exchange group and secure messages with other co-workers

### WhatsApp Archiver

- Archive WhatsApp calls, text, chats, images, files and deleted messages
- Capture communication from phone or cloud using WhatsApp Phone Archiver or WhatsApp Cloud Archiver
- Native WhatsApp features and functionality, works from Mobile, Web and Desktop
- Works for iOS and Android, Corporate and BYOD devices. Business/private chat separation

### WeChat Archiver

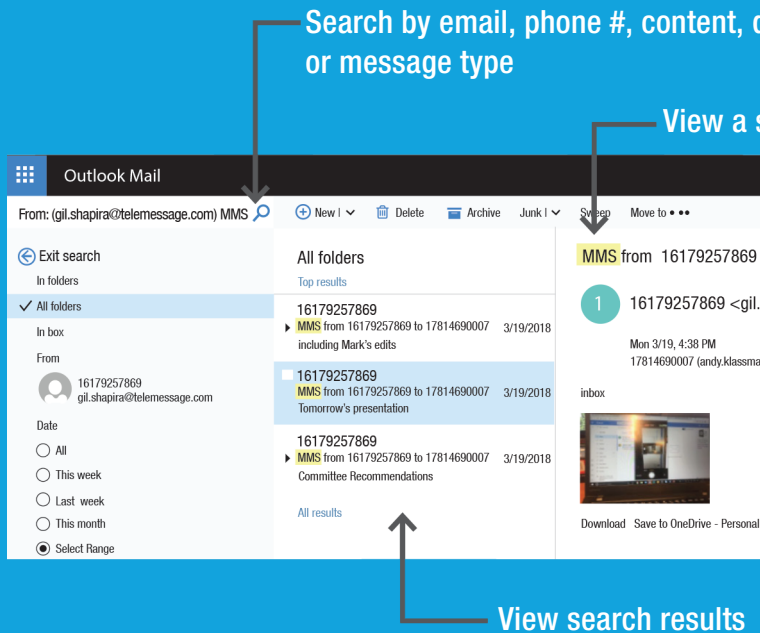

- Archive WeChat calls, text, chats, images, files and deleted recall messages
- WeChat communication is uploaded from the phone for archiving
- Works from WeChat Work mobile app, as well as WeChat web interface
- Works for iOS and Android. Corporate and BYOD devices. Business/private chat separation
