

Unmute your potential

# Get over the Language Barrier

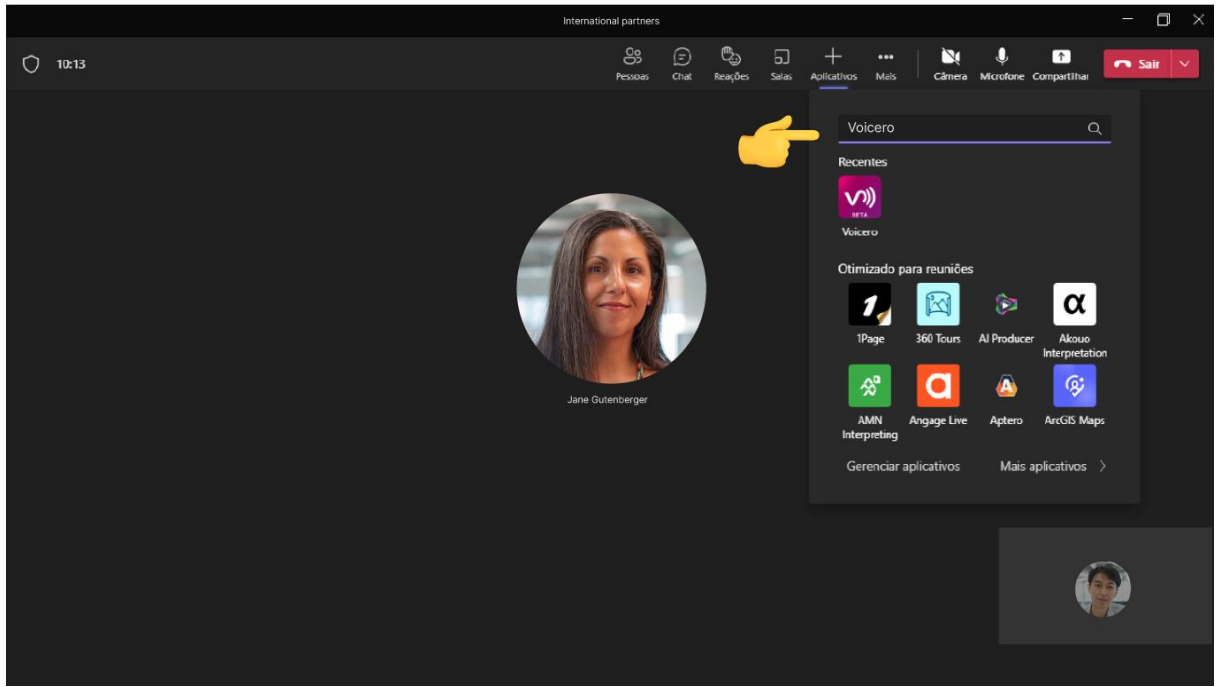

Meet Voicero, a Live innovative voice translator that translates your voice in real-time during Microsoft Teams meetings. Voicero is about unmuting your true potential and making your mark in every meeting within the company, regardless of the language you speak.

Overcome the communication barriers and express your valuable expertise to everyone. Voicero is very intuitive and easy to use. Just add it to the Microsoft Teams app and you're set. You and your teammates can start setting it up individually.

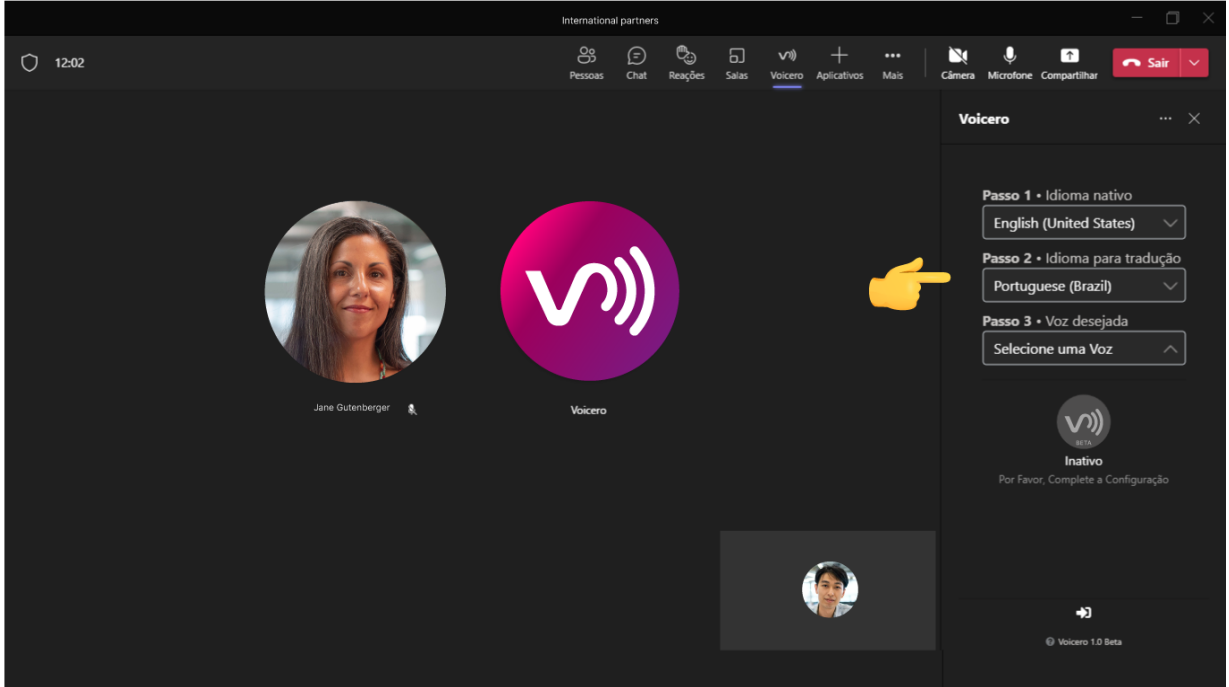

How it works

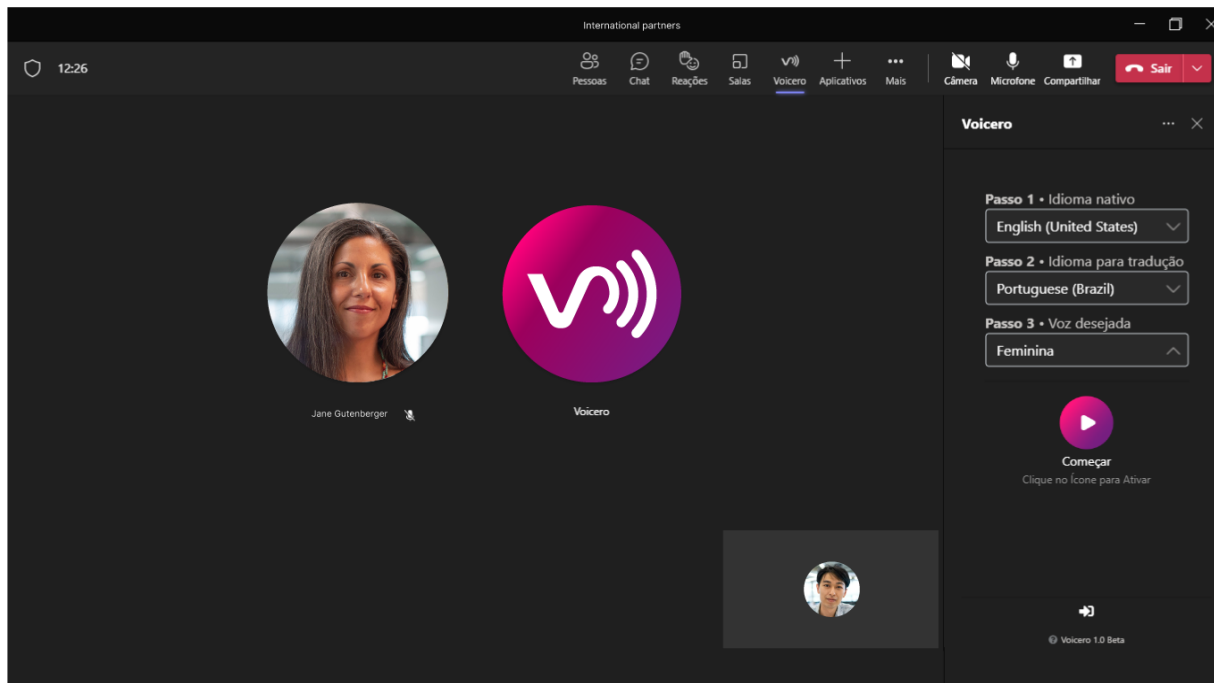

Search for Voicero in Apps

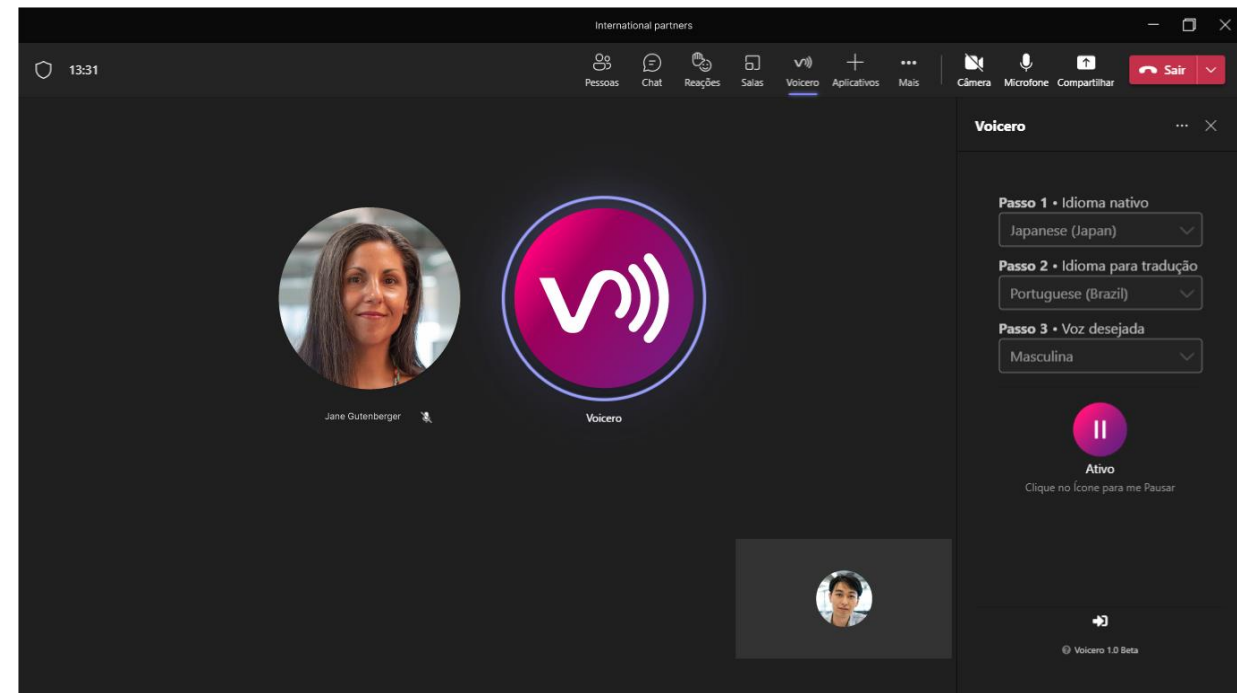

Set the languages and the voice

After configuring, click on 'start' to be translated

Voicero will translate. When you want to stop being translated, click 'pause'

# About the team

Woopi is a Brazilian artificial intelligence company, that creates Natural Language Processing products. Sophie, Woopi's AVI, is used by dozens of the world's largest corporations and millions of users in 4 continents. We will continue looking for ways to use AI to change people's lives.
