About us

With over 15 years of experience working with leading HR solutions, we are the ideal partner to structure and streamline your HCM processes. Fourvision improves the lives of your workforce as the Global leading implementation partner of Microsoft Dynamics 365 Finance & Operations Human Resources.

We have established industry knowledge and skill to resolve your complex HR challenges. We listen to you and stand together to ensure your solution suits your exact needs.

What we offer

Every organization has requirements for an HR system specific to their situation. In many cases the standard ‘out-of-the-box’ Dynamics 365 Human Resources covers these needs perfectly. However, we have found that many organizations need additional functionality.

Our skilled consultants implement Microsoft Dynamics 365 HR with minimum disruptions to your daily business processes, allowing your HR team to continue their daily business whilst learning from our best practice approach on the side.

We offer an extensive suite of cloud-based web applications, providing more flexibility and overall a more optimized experience for Microsoft Dynamics 365 Human Resources. Ensure your HR processes are fully supported throughout the entire employee lifecycle.

Why FourVision?

Modern applications

Our Web Apps add functionality and extend the capabilities of the out-of-the-box Microsoft Dynamics 365 Human Resources solution.

All Web Apps seamlessly integrate with Dynamics 365 F&O and HR. Each Web App supports a different range of functions that makes the lives of your workforce much easier and prepares your company for the future.

Our Web Apps

Boarding

Our Boarding Web App allows you to create templates that outline tasks for any employee, specified to their position within your organization

Document Management

The App ensures that all documents are linked to the correct individual employee from the moment you decide to hire and onboard them up until the minute they retire.

HR Request

You want to be able to organize the requests so that your employees can track the status of their inquiries or leave extra comments with each status change without overwhelming your HR department. That is why our Web App HR Request structures, collects, redistributes, and monitors all requests made by people in your organization

Performance Management

Your human resources department can configure any type of performance review, 360 degrees review, or assessment to monitor the progress of each individual employee.

Payroll Interface

Our payroll web app will help you streamline your company's payroll process, both domestically and internationally thanks to the Dataverse connection. All personnel data that you stored in your HR system can be accessed through the secure cloud-based data streaming. The interface makes the translation between employee details and Payroll.

Timesheets

Time is valuable to your organization. So how do you spend yours? Employees can easily register their hours on their computers or mobile devices. The registered time will immediately go to the correct supervisor to be approved.

Succession & Workforce Planning

Secure your company for the future by identifying and developing leaders

Our Succession Web App and added Workforce Planning functionality supports your company's needs by helping you plan and organize your workforce using current and predicted job positions. This will help you grow and prepare for the future without any surprises.
