

# Arius Enterprise<sup>®</sup>

A complete end-to-end reserving solution for large insurers

## Problem

It is increasingly difficult for actuaries to have total confidence that their reserves are adequate and reasonable.

- Deadlines are tightening, while the reserving process is more complex
- The insurance business is increasingly sophisticated, and actuaries may not always have the tools they need
- Senior resources spend time reviewing work and juggling projects instead of doing the in-depth analysis that only they can do
- Regulators demand rigorous controls over important data and volatile spreadsheets

## Introducing Arius Enterprise

Arius Enterprise helps large, sophisticated insurers analyze loss reserve data quickly and efficiently, automate key processes, and track and manage your many concurrent reserving projects to deliver results reliably and on time.

## Why Milliman?

Milliman is one of the largest actuarial consulting firms in the world, with 60 offices in 30 countries

We are big enough that our clients can rely on us to be there when they need us, while also providing a very personal level of service

Though it's based on the latest Microsoft technologies, Arius Enterprise is already well proven in the field

Milliman's software and successful implementations represent almost 50% of our revenue

We have implemented the solution at a number of sophisticated insurers, with additional implementations currently in process
