

R O C O S

Robotics companies can now move faster.

Rocos provides a platform for secure robot connectivity, the ability to remote monitor and manage connected robots as well as the developer tools to rapidly build your own Web, iOS and Android applications. The platform supports cloud and local networks connectivity for robots, ground control stations, and operator interfaces.

- ✓ **Secure and scalable**
- ✓ **Get to market - faster**
- ✓ **Reduce engineering cost**
- ✓ **Better customer experiences**

Gain more time to focus on your competitive advantage, rather than platforming

Automating robot workforces – globally

We're inspired by a globally connected future, where autonomous robots accelerate change for good - and we're proud to be providing some of the important technology that will get us there.

See the future of robotics for yourself.
