

Accelerate your Power Automate migration

Intelligent Automation Migration Factory

MAXIMIZING PROCESS POTENTIAL ON A PLATFORM OF CAPABILITY

Automation of business processes has become top of mind and this trend has accelerated with remote work, need for speed and customer centricity. Those who have been automating for years, face other challenges – process redundancy, technology and infrastructure capacity, migrating estates to the cloud, legacy configurations. These factors impact the value of the business case, adding cost and pressure on already exhausted resources.

Our Migration Factories, facilitate, execute, simplify, refresh, reimagine and reconfigure those automations on a modern platform in the cloud – migrating your process estates effectively and efficiently.

Once migrated our factory can manage and maintain your automations, innovating and optimizing the estate, ensuring you are always achieving maximum results from your investment.

Avanade's **Migration & Automation Factory** partners with you to unlock the value of your existing process estates and push beyond "mere migration", to transform business through automation – intelligently, dynamically and with a fresh new perspective to add new business value.

AUTOMATION MIGRATION AT PACE AND SCALE

Our Migration offering combines the most powerful process automation design environment and migration tools on the market, coupled with Avanade's enterprise intelligent automation disciplines, assets, tools, accelerators and factory migration teams to **help clients migrate to PAD for 50%-75% less than many manual migrations.**

Migrate

Update your old, outdated system to a cheaper, faster, more valuable and versatile system.

Speed to value

Use our expertise and accelerators to realize your total value, cost avoidance and total cost of ownership (TCO).

Cloud infrastructure

Leverage inbuilt redundancy and low maintenance to instantly scale automations.

Cheaper licencing

When you migrate to PAD, licencing is up to 70% cheaper.

IT'S MORE THAN JUST MIGRATION – HOW IT WORKS

Microsoft is the most complete "Platform" providing extended capability through Automation, Apps, Virtual Agents, Reporting, AI and connectors, with the lowest TCO.

Source RPA platform

- Input – Source RPA platform code
- Reverse engineer existing automation
- Extract process flow
- Extract automation code

Blueprint platform

Define

- Import existing process
- Import existing automation

Design

- Validate automation design
- Incorporate additional dependencies and traces

Deliver

- Generate migration analytics report
- Export automation to target RPA platform

Target RPA platform

- Output – Target RPA platform code
- Faster migration process
- Accelerate development
- Accelerate testing
- Sustainable governance and control model

Accelerate your Power Automate migration

Intelligent Automation Migration Factory

VALUE TO YOU

50%*

Faster Migration

Rapid migration and deployment of existing automations to Microsoft Platform, realizing savings quickly

70%**

TCO Savings Annually

Cloud first, scalable, resilient infrastructure significantly reducing and eliminating IT spend

TALENT @ SCALE

Expert Resources

Faster ramp-up with increased access SMEs across multiple intelligent automation technologies & Azure

STRONG PARTNERSHIP

Microsoft & ISV's

Aligning with Microsoft and Blueprint Systems to create latest and greatest migration experience

* Dependent on legacy platform

** Based on typical license and hardware rates

AVANADE IS THE BEST PARTNER TO JOIN YOU ON THIS JOURNEY

5,000+

Business excellence and Power Platform automation experts

15,000+

AA, Blue Prism, UiPath, and Power Automate Professional

Microsoft

Preferred Partner and Launch Partner for Migration

10,000+

Intelligent Automations deployed
