

Metadata-Driven Solutions for Digital Assets

GrayMeta enables companies to transform physical assets to digital, connect and access them from anywhere, and create valuable metadata using machine learning & AI services.

Curio is an enterprise solution that delivers value by leveraging machine learning to drive organizational efficiencies and to enable content monetization through the use of metadata.

Our Platform provides relevant insights and simple solutions for a business user to solve a variety of content problems across the enterprise, all without the need for custom development.

With our solution, you can:

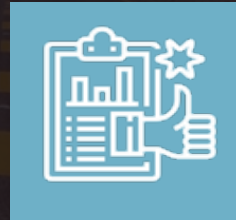

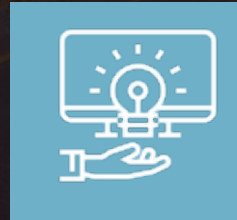

- Connect to, and analyze your data without having to move or ingest it,
- Discover, identify and associate large volumes of data spread across your organization
- Increase the efficiency of your workforce
