

TrustElevate is proud to partner with Swoperz to create a safer online environment for children. Together, we are committed to protecting young users as they explore the digital world.

Swoperz was founded by parents who understand the challenges of keeping up with children's clothing needs. As the only preloved marketplace run by kids and managed by grownups, Swoperz offers a unique solution to the common problems all parents face: high costs, rapid growth spurts, ever-changing style preferences, and the struggle to find the time to shop.

Swoperz wants kids to be in control of their style but always with a conscience. They have created a safe, grownup-verified environment where kids can swap their clothes without any worries about the planet or their online safety.

"We're teaming up with TrustElevate to create something really special," says **Vicky Fuller, Co-Founder of Swoperz.** "Our vision is to build the only verified, safe online eco-system for kids. Think of us as positive disruptors in retail - we're not afraid to shake things up. We're leading the way to revolutionise how kids interact with online preloved shopping, making it safer and more fun. **By partnering with TrustElevate, we're turning this vision into reality.** We're incredibly excited about what we're building, and we think you will be too."

Our TrustElev8 solution provides the essential tools for age verification and parental consent, ensuring compliance with stringent data protection regulations. By utilising TrustElevate's technology, Swoperz offers parents peace of mind knowing their children are safeguarded while enjoying the platform.

TrustElevate is not just a standalone solution. We also partner and integrate with other age verification platforms that offer many common services, but may lack VPR, VPC and the verification of individuals under 18 years old.

	TrustElevate	Competition
Verifiable Parental Responsibility (VPR) score - high assurance for social media, gaming, streaming, payments, banks, fintech	👍	✘
