

Capability Statement

Questionmark provides a trustworthy, secure cloud-based assessment management system for U.S. governmental and military agencies to ensure they are always prepared for the job at hand.

Questionmark is widely used by U.S. governmental and defense agencies to author, deliver and report on surveys, quizzes, tests and exams.

✓ **Improve performance**

✓ **Meet compliance**

✓ **Unlock potential**

Differentiators

- Collaborative, secure authoring of surveys, quizzes, test, exams, and observational assessments
- Blended assessment delivery methods to support a broad range of devices and security needs
- Additional Features that can be added on for additional price. Printing and scanning, paper assessments that can be printed, scanned, uploaded, and scored for reporting. Advance configuration for training, integration assistance and some template design.
- Secure content delivery with locked-down browser to reduce the risk of cheating and content theft
- Reporting and analytics item analysis reports, question statistics and much more

Past Performance

- Trusted by more than 2,500 organizations and their people to help them make better decisions to meet critical challenges
- Federal Risk and Authorization Management Program (FedRAMP) Authorized to deliver cloud-based assessments for the US government and military organizations
- Listed on FedRAMP Marketplace (marketplace.fedramp.gov) with 4 ATOs with Department of Homeland Security, US Airforce and FDIC
- Flexible API's, xAPI's and support of industry standards to effectively integrate and interoperability with a variety of enterprise systems. cheating and content theft
