

MAKING INDUSTRIES SMARTER

The Internet of Things is changing how we work with industrial machines and equipment. Relayr's end-to-end IIoT solution enables companies to stay relevant, by unleashing more data from existing machines and systems to improve business outcomes.

Our technology stack and professional services team are trusted by companies worldwide. Our partnership with Munich RE / HSB, allows us to offer the first ever insurance-backed IIoT Project Outcome Guarantees.

This makes relayr the only IIoT provider enabling companies to offer OPEX based products to their respective markets; by providing financing, insurance, IIoT technology, and delivery from a single source.

All this ensures you can achieve the business outcomes for your company's future with minimal risk.
