

VIRTUAL CABLE

The company behind UDS Enterprise

Who we are

VIRTUAL
CABLE

VIRTUAL CABLE

Virtual Cable is a company specializing in the **digital transformation of the workplace**.

For **more than a decade**, the company has **developed**, supported and marketed UDS Enterprise. Its team of experts has designed **VDI solutions** tailored to **each sector**.

Virtual Cable is formed by a cohesive and highly qualified **human team**. Virtual Cable professionals have **more than 30 years of experience** in IT and software development and more than 15 in virtualization technologies.

We are **committed** to serving our clients with **professionalism** and **efficiency**. The **proximity** and **accessibility** of all the company's departments is one of our great values. **Agility** and **personalized service** is one of our hallmarks.

MISSION

Democratize the adoption of **VDI** technology by developing **sustainable solutions** available to everyone and for any user profile.

VISION

Build a **freer society** thanks to the power of **VDI** technology.

#WemakeVDIhappen

We make the **VDI projects** of **all our clients a reality**, customizing them to the maximum to achieve a unique **user experience fully adapted** to the needs of each person. We develop different **solutions**, because we are not all the same.

UDS ENTERPRISE

VIRTUAL CABLE'S VDI SOFTWARE

[UDS Enterprise](#) is a revolutionary software concept for creating a fully **customized workplace virtualization platform**. It provides **secure 24x7 access** from **anywhere** and **any device** to all applications and software within an organization or educational institution.

It brings together **Windows and Linux desktop and application virtualization** into a single console, as well as **remote access** to **Windows, Linux, and macOS** devices.

Its Open Source base ensures **compatibility** with **any third-party technology**. It can be deployed **on-premises**, in public, private, hybrid, or **multicloud** environments. It can even **combine** multiple **environments simultaneously** and perform **automatic** and intelligent **overflows** to optimize performance and efficiency.

All with a **single subscription**.

MAXIMUM SECURITY

UDS Enterprise integrates **advanced security functionalities** and allows you to incorporate all the mechanisms and policies you need.

Multi-factor authentication (MFA), Zero Trust, end-to-end **encryption** and much more at no extra cost.

UDS Enterprise facilitates **compliance** with the **highest international standards**.

AUTOMATION

UDS Enterprise **automatically manages** the entire life cycle of services. Its advanced **calendar system** allows you to **schedule** and **automate** important tasks, so your IT team can focus on other projects.

COMPATIBILITY WITH ANY TECHNOLOGY

Virtualization platforms: Citrix Hypervisor, Microsoft Hyper-V, Nutanix Acropolis, Proxmox, RHEV, oVirt, VMware vSphere, XCP-ng...

Hyperconvergence systems: Nutanix, Nodeweaver, Proxmox (CEPH technology), SharxDC, VMware vSAN, XOSAN...

Cloud orchestrators: VMware Cloud Director, OpenStack, OpenNebula, XOA...

Connection protocols: HP Anywhere (PCoIP), HTML5, NICE DCV, NoMachine NX, RDP, RDS, RemoteFX, SPICE, XRDP, X2GO...

Authentication systems: Active Directory, Azure AD, CAS, eDirectory, OpenLDAP, Radius, SAML V.2, Internal authentication system, Device authentication system (IP)...

Physical equipment orchestrators: OpenGnsys.

Enable as many as you need to run simultaneously.

FLEXIBILITY

Choose one of these environments or configure smart, automatic overflows:

- **On-premises**
- Public, private or hybrid **cloud**
- **Multicloud:** Amazon Web Services (AWS), Microsoft Azure, Huawei Cloud, VMware Cloud Director, OpenStack...
- **DaaS:** Managed VDI Service

COST SAVINGS

The flexibility, adaptability and technical capabilities of UDS Enterprise allow you to combine licensed technologies with **no-cost solutions, free and open source** systems. Thus, each organization can obtain **maximum performance** at the cost that best fits its budget.

These advantages are combined with our marketing model based on **subscriptions by user tiers**, which include a unique **flat rate** in the market **from 350 to 1,000 users**, and **unlimited users** for Education.
