WE GET BUNDLING
YOUR SECURITY CLOUD LOGS
INTO ONE SOURCE.

CDW Amplified™ Endpoint
Microsoft Sentinel Workshop and Pilot

The Microsoft Sentinel Workshop and Pilot engagement helps you experience the native scalable cloud-based SIEM and SOAR solution within your own production environment. Additionally, you get a bird's-eye view across all data ingested and detect threats using Microsoft's analytics and threat intelligence. You are able to investigate threats with artificial intelligence and hunt for suspicious activities.

The workshop covers best-practices configuration recommendations for both product and solution. This provides evidence-based insight to ensure that security, governance and compliance is uplifted into your multicloud solution. This benefits organizations with an Azure Tenant or an Office 365 commercial subscription, as well as Office 365 U.S. Government Community (GCC) clouds.

The Microsoft Sentinel Workshop and Pilot can help you achieve:

- Operational Efficiencies
- Reliability
- Agility

Orchestrating the Right Solution

The Microsoft Sentinel Workshop and Pilot allows you to do the following:

- Understand the features and benefits of Azure Sentinel
- Discover threats to your Microsoft 365 cloud and on-premises environments across email, identity and data
- Understand how to mitigate threats by showing how Microsoft 365 and Azure security products can help protect against threats that are found
- Create a defined deployment roadmap based on your environment and goals
- Develop joint plans and next steps for security and compliance of Office 365, Windows 10 and EMS
- Quickly enable users the ability to adopt advanced security features in Office 365

Also included is a complimentary 45-day trial of Brainstorm to quickly enable users to swiftly adopt advanced security features in Office 365 or Azure.

CDW GETS MICROSOFT

CDW has been dedicated to advising on, selling and delivering Microsoft products since 1999. We help customers maximize their software investment through our licensing and solution expertise, personal customer service and strong Microsoft relationship. With deep implementation experience in Azure solutions, CDW is the right partner for delivering this service.
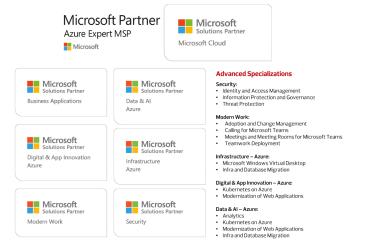

CDW's full lifecycle of Services can support your business no matter where you are on your journey

Design → Orchestrate → Manage   On-Premises → On-Journey → Cloud-Based

CDW | **CDW AMPLIFIED**™ **SERVICES**

Services Overview

The following are included in the Microsoft Sentinel Workshop and Pilot:

Service Phase	Included
Assessment: Evaluate the existing environment and readiness for Microsoft Sentinel features, which will typically include analyzing the current on-premises management solution and security protocols throughout your environment.	✓
Envisioning: We work with your team to understand how they work today, and how Microsoft Sentinel fits into their workflows by developing high-value use cases.	✓
Planning and Design: Workshops with your administration team and project stakeholders to ensure that Microsoft Sentinel features meet all of the necessary requirements to support the end-state environment.	✓
Success Planning: We work with the appropriate project team members and stakeholders in a series of formal and informal sessions to discuss the development and execution of the customer training, communication and support requirements that will benefit the organization most.	✓
Build and Pilot: Setup and configuration of Microsoft Sentinel features specified during the design and planning, including hybrid, implementation and testing of policies, legacy integration and testing, and validation through pilot groups.	✓
End-User Enablement: We help your users not only understand how Microsoft Sentinel works, but also help them understand how it works with their workflows through onsite end-user training, video on demand and end-user training guides.	✓
IT Success Sustainment: We uplift your support staff to continue the success that is built through the rest of the engagement through FAQs, administrative training and best practices.	✓
Manage and Measure: Review qualitative and quantitative data to provide you with actionable recommendations to increase your adoption of the platform through built-in and custom tools as well as surveys.	✓
