

GANNET

Gannet is the **new generation** of maintenance software designed for airlines, helicopter operators and private jet operators.

GANNET provides **100% compliance** for all the requirements from EASA Part-M, Part 145 and Part-66.

Our Mission

Keeping the Gannet safe and simple

Constantly improving the Gannet on the basis of "made by engineers for engineers"

Maximize efficiency and minimize hurdles and downtime

Nurture the bond and ties between all the members of the Gannet family

The base line is trust, control and documentation
