velocity
by kagool

Rapid data ingestion solution

Efficient and simple to use, no matter how large or complex your data estate.

WHY did we create Velocity?

- Accelerate access to data in Azure for digital transformation
- Make SAP data accessible to non-SAP analysts and scientists
- Always remain in control of your business' data
- Use technology you know and can depend on for your business
- Efficiently integrate Azure with your SAP landscape

HOW is Velocity different?

- Deploys within your business' Azure Tenant using 100% PaaS
- Natively integrates your data with Azure data platform services
- Automated SAP delta management (CDC) is available out of the box
- GUI driven end-to-end process - no code is required to ingest data
- Translates SAP data and enables low/ no code SAP data model

WHAT does Velocity do?

- Near real-time data replication from your sources to Azure data platform
- Designed to extract data from any SAP application layer (ERP or BW)
- Ingests data directly to Azure Gen2 Storage, SQL, Synapse and Snowflake
- Supports extraction from Oracle EBS, and Oracle, SQL, HANA Databases
- API Connector for SaaS services (ADF accelerator)

Rapid   **Secure**   **Cost-effective**

Velocity moves your data at speed, securely and cost-effectively.

It's easy to change and adapt to your changing business environment, even without coding or technical knowledge.

This makes it the perfect option to make your business more agile and resilient to a rapidly changing business world.

> **I have really enjoyed the experience and expertise of the entire Kagool team. I am glad that Microsoft has such partners, and they recommended Kagool to us.**
>
> Mr Nipun Sharma, Data & Analytics Architecture Manager at Komatsu Australia

- E2E Ingestion Automation
- Auto Delta Management
- SCD Support
- Unlimited Usage
- Easy to Install
- Nearly Real-time Replication
- SAP & Oracle Apps
- 100% PaaS

> **With Azure, we now have the capability to rapidly drive value from our data. The actionable insights from the data models we're creating will help us increase revenue, reduce costs, and minimise risk.**
