

# Delivering tangible security and business outcomes

## Managed Security Services

Reduce risk, increase resilience, and defend your organisation against cyber security breaches and attacks.

## Professional Security Services

A complete portfolio of consulting services, providing advice and guidance across the entire spectrum of cyber security risk and resilience.

## Microsoft Azure Sentinel

The central technology that underpins the Security Operations Centre (SOC).

Crown  
Commercial  
Service  
*Supplier*

We believe everyone has a fundamental right to pursue their vision in freedom.

**Quorum Cyber** was created to defend teams and organisations that feel overwhelmed by the increasing risk of cyber security breaches and attacks.

**Federico Charosky, Managing Director**

# #WeFightBullies

Proactive defence enabling organisations to confidently operate in an increasingly hostile digital landscape

In this ever-evolving threat-landscape, it's challenging for any organisation to effectively and efficiently manage their attack surface and exposure.

Our products and services have been developed by our in-house teams, people with a track record of delivering cyber security into large enterprise organisations across the world such as banks, global cloud providers, and global brands.
