

THE FLYNEX PLATFORM – SMART DATA FOR YOUR SUCCESS.

Collect data automatically, manage it centrally, and analyze it intelligently – for more efficient infrastructure inspections.

We know how time-consuming and costly the operation and maintenance of masts, buildings, radio towers, etc., can be. That is why we have developed the FlyNex Platform, a solution that makes the inspection and management of numerous assets faster, cheaper, and more sustainable.

Unlike fragmented solutions, FlyNex's all-in-one platform covers a complete end-to-end process: from planning to data collection to analysis. Manage thousands of assets and associated data centrally in the cloud, and scale your operations almost limitlessly for thousands of objects.

Increase productivity

Reduce inspection time by up to 75% thanks to digital and automated processes.

Unlimited scaling

Inspect and manage thousands of business assets with just one platform.

Maximize ROI

Demonstrably reduce the risk of outages by up to 90% and increase the lifespan of assets.

Numerous companies, including those in the energy, construction, real estate and telecommunications industries, already trust the FlyNex Platform.
