

Innovation unleashed: Exploring the value of ServiceNow and the Microsoft Cloud

As businesses face growing complexity, you need to...

Accelerate cloud value

Despite increased investment in the public cloud, organizations struggle to demonstrate its value.

Ready to accelerate Microsoft Cloud adoption while reaping the rewards of your investment?

Empower employee experiences

Staying productive in the digital era requires tools that work together to streamline tasks.

Want to help employees and agents do more with the apps they use every day?

Power your organization with AI

The pace of work is outpacing our ability to keep up. AI has the potential to fix that.

Interested in using Generative AI to power your business?

Accelerate cloud value

What are your cloud adoption goals?

Faster Application modernization

65%

of application workloads will be optimal or ready for cloud delivery by 2027

51% of IT spending will have shifted from traditional solutions to the public cloud.

Minimal Disruptions and security threats

\$4.35M

was the average cost of a data breach in 2022.

Over 30% of outages resulted in a direct revenue loss.

43% of organizations experienced data loss from outages.

Better Governance

40%

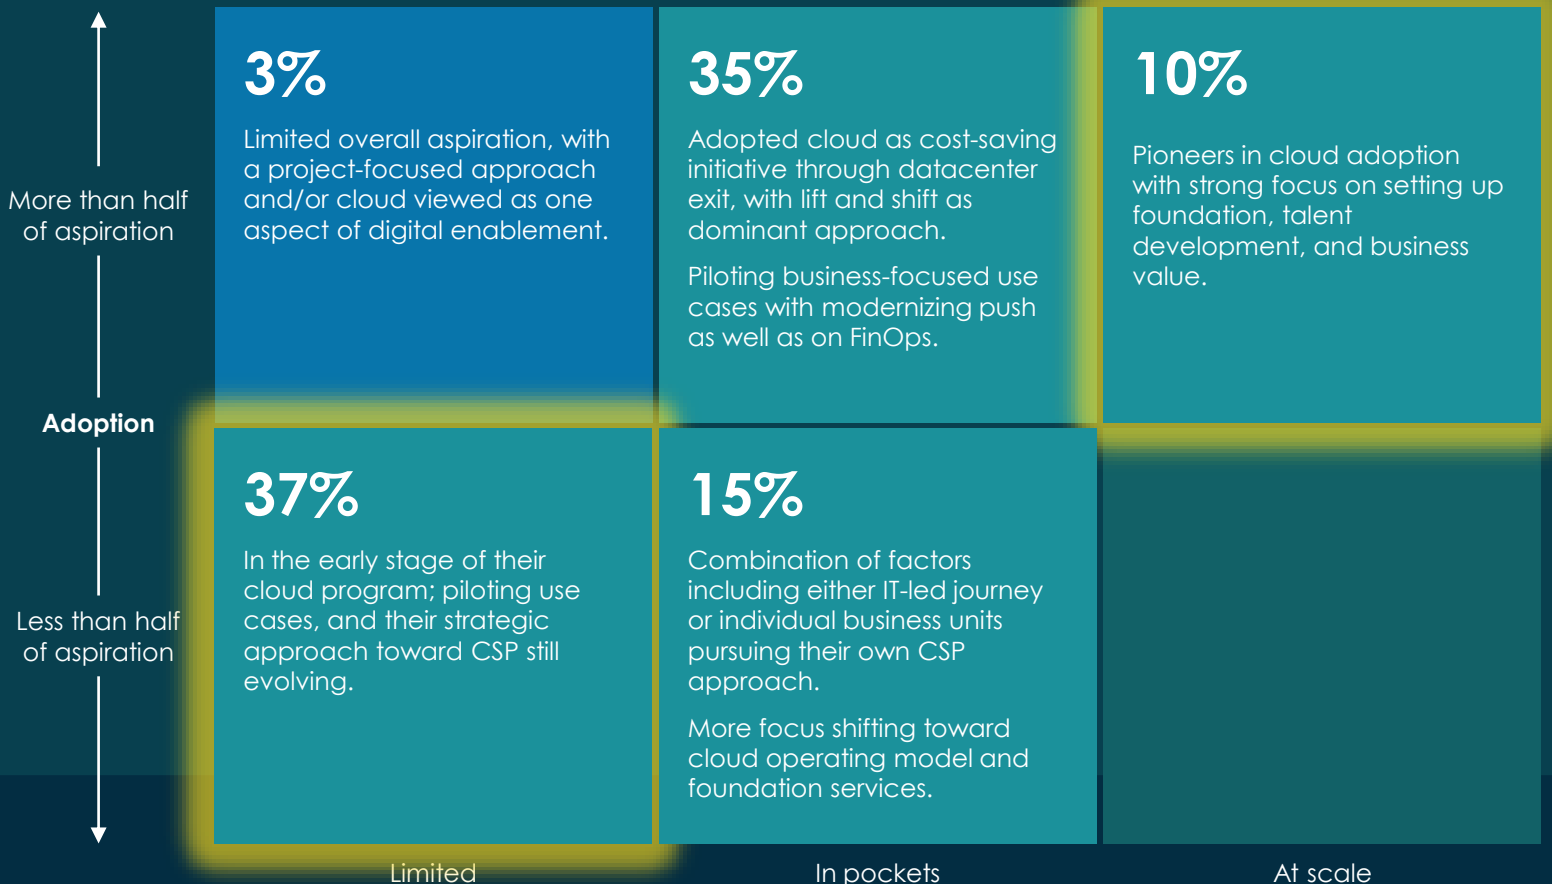

On average, 40% of workloads are oversized.

30% of cloud subscriptions are underutilized.

You have committed to adopting public cloud, but are you realizing value at scale?

While 50% of companies are realizing value in pockets, only 10% are finding it at scale.

Cloud value capture versus adoption

Common customer challenges. How is your Cloud journey so far?

Legacy processes

- Poor incident and change management
- Delayed time to market for new cloud apps

Escalating costs

- Duplicate, redundant, out-of-date applications
- Massive cloud overspend or underutilization

Increasing risk to business

- Greater levels of technical debt
- Multiple systems of record create issues with GRC

Misalignment

- Poor strategic visibility for cloud initiatives
- Siloed Biz, Dev, Ops, and Sec teams

Accelerating cloud adoption

“95% of new digital workloads will be deployed on cloud-native platforms by 2025.”
