

Dimo Maint

FACILITATE YOUR MAINTENANCE MANAGEMENT

SOFTWARE INNOVATION ADAPTED TO THE CHALLENGES FACED BY MAINTENANCE TEAMS

Simplify your management and experience maintenance differently!

Boost the performance of your assets

Improve the operational efficiency of your teams

Reduce your maintenance costs

Highlight your actions with your management team

“

The DIMO Maint solution greatly facilitates the transfer of knowledge by implementing a common work methodology for the entire maintenance department. These technological improvements have helped us secure our technical data and gain efficiency.

Maintenance Manager at Babolat

Simplify your daily life and reduce stress!

Improve your operational efficiency

Communicate in real-time

Enjoy complete safety at work

Give feedback on your experience

“

As someone who does not come from an IT background, I was reluctant to use the software at first. Ultimately, **it went very well and made everything much easier.**

Maintenance technician
at Beneteau Group

CONNECTED TO THE INFORMATION SYSTEM

Rely on the integration expertise of DIMO Maint

Save time integrating the CMMS into your information system

Take advantage of our catalog of well-known connectors

No need to limit yourself with our API

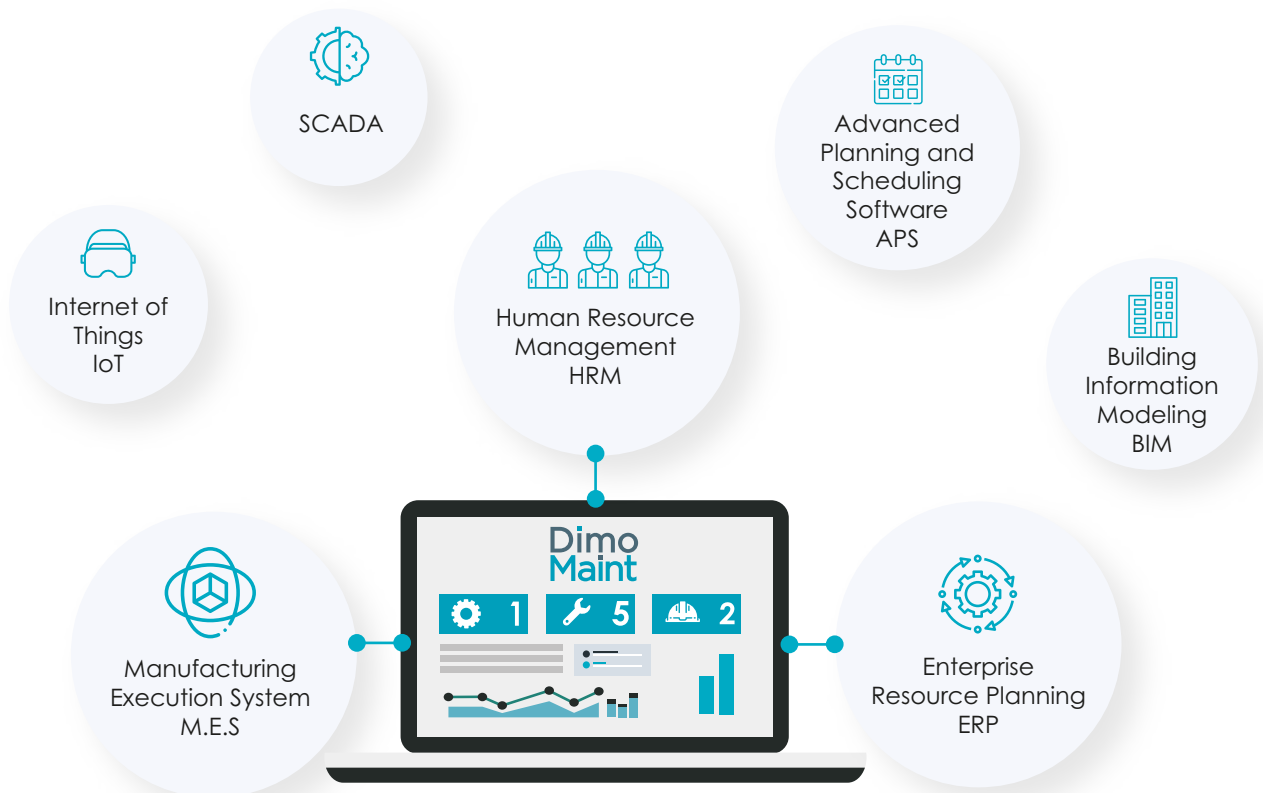

Opt for rapid deployment

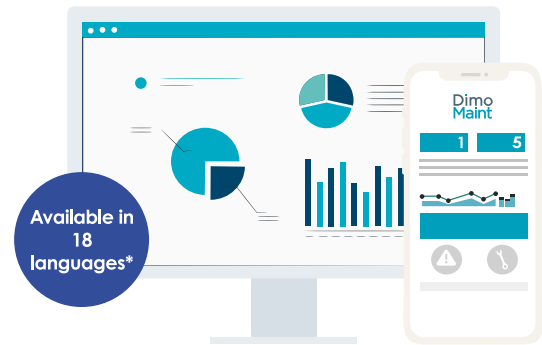

We set up a connector to tie the consumption of parts in the CMMS to the stock of spare parts managed in Dynamics 365 Business Central. It helped us develop a detailed, comprehensive, and financial vision of maintenance with the breakdown of costs by B.U. and by assets. It has also enabled better item coding and spare parts management.

IT Manager at Alsys Group

EVOLVE WITH A NEW GENERATION CMMS USER-FRIENDLY AND SCALABLE

DIMO Maint has designed a range of new generation maintenance software to meet all your requirements in terms of ease of use, mobility, providing an adapted and scalable functional scope, quickness of deployment, interoperability with your current information system and security of your data.

Cloud-based CMMS

- **Available everywhere anytime**
- **Automatic** updates
- No **initial investment in its infrastructure**
- **Highly secure data** hosting

On-Premise CMMS

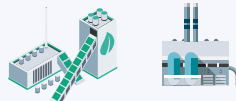

- **Installation on your servers**
- Local hosting of **your data**
- Available **without internet connection**
- **Regular updates of the software** to operate

A well-suited software

You are a small or medium-sized organization

Choose a simple, scalable and quick to deploy CMMS

You have a Multi-site organization

Choose a flexible and user-friendly CMMS adapted to your multi-site organization.

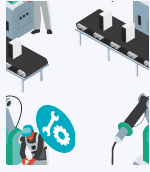

You have an international deployment project

Benefit from our experience, the methodology and the software suited to your multi-country context.
