# THE BEST OF BOTH WORLDS

## HOW SOLVER CAN HELP YOU

Solver makes it faster and easier to deploy and maintain your Power BI dashboards by providing a user-friendly, pre-configured cloud data warehouse with numerous data source connectors for cloud and on-premise data sources. Using Solver and its Power BI connector, you can reduce the time to deploy Power BI from weeks or months to days!

In addition to its value as a data warehouse for Power BI, Solver has a powerful cloud-connected Excel report designer add-in that compliments your Power BI dashboards by adding leading Financial Reporting, Consolidations, Budgeting & Forecasting functionality. All running in the Microsoft Azure cloud with a user-friendly web portal interface.

**Connect Solver with your data sources to combine them in the single, user-friendly Solver data warehouse and then deliver it to Power BI in a single stream with Solver's Power BI connector**

## Typical Power BI Customer Needs

| | |
|---|---|
| Lower cost and time to deploy Power BI | ✓ |
| Less technical skills to deploy and maintain integrations/data for Power BI | ✓ |
| Simplify Power BI deployment with a pre-configured, cloud data warehouse | ✓ |
| Business rules for currency conversion, eliminations, etc. | ✓ |
| User-friendly data entry interface (capture budgets, forecasts, KPI targets, etc.) | ✓ |
| Powerful report writer to compliment Power BI with formatted financial reports, etc. | ✓ |
| Need to combine data from operational and financial (Solver) data sources | ✓ |
| Pre-built connectors to combine ERP data, CRM data, Sales data, etc. in the Solver Data Warehouse | ✓ |
| Non-technical integration to Power BI to deliver all data sources as ONE feed to PBI | ✓ |

## Technical Facts

| | |
|---|---|
| Multi-tenant architecture running on the Microsoft Azure platform | ✓ |
| User-friendly HTML5 portal interface to manage data warehouse and integrations | ✓ |
| SQL Azure-based Data warehouse with up to 100 modules & up to 100 dimensions | ✓ |
| Pre-built Solver connector and API to deliver fact and dimension data to Power BI | ✓ |

# CLOUD DATA WAREHOUSE
# & CPM FOR POWER BI

POWERED BY

**solver**
