

Imperium Job Safety Analysis

Your Go-To Tool for Workplace Safety Analysis.

WHAT WE OFFER

Secure your workplace with Imperium Job Safety Analysis – the ultimate solution for ensuring workplace Safety and employee well-being! Complying with OSHA (Occupation Safety and Health Administration) standards, our comprehensive package empowers you to evaluate safety provisions and analyze health measures efficiently. Benefit from 4 pre-built templates that cover chemical, ergonomic, physical, and biological safety hazards tailored to your specific needs. With real-time data visibility through intuitive dashboards, and streamlined data collection, you can proactively prevent and eliminate workplace hazards. Make informed decisions and act with insights.

WHY IMPERIUM JSA?

Pre-Configured Assessment

Imperium JSA simplifies workplace safety analysis with pre-configured assessments, calculating risk scores based on OSHA standards. Customize assessments by adding questions, sections or creating new ones.

Employee Canvas App

Simplifies JSA survey assignment to employees, allowing customization based on criteria like department or location. Surveys can be one-time or recurring with flexible scheduling options.

OSHA Scoring

It provides risk scores for workplaces based on OSHA metrics upon survey completion. Admins can configure email notifications to get alerts based on defined score thresholds. Track aggregated data on risk exposure, severity, and probability to take proactive actions.

Analytics

Review real-time insights on employee safety, healthcare, protective equipment, and workplace conditions in the management dashboards. Pinpoint hazards and areas for improvement to drive new organizational protocols.

KEY USE CASES

1

Chemical Safety

Generate metrics on the severity of chemical reactions and employee experiences with regular work involving hazardous chemicals and chemical risk factors.

2

Ergonomic Safety

Identify health hazards associated with workplace design and maintenance for individual employees.

3

Physical Safety

Protect the physical health of employees in industries such as construction, mining, and load lifting. Gather details on employee exposure to hazardous gases, materials, radiation, and oxidants.

4

Biological Safety

Validate health checks for labs, pharmaceuticals, and other employees, including interacting with animals, plants, and microorganisms.
