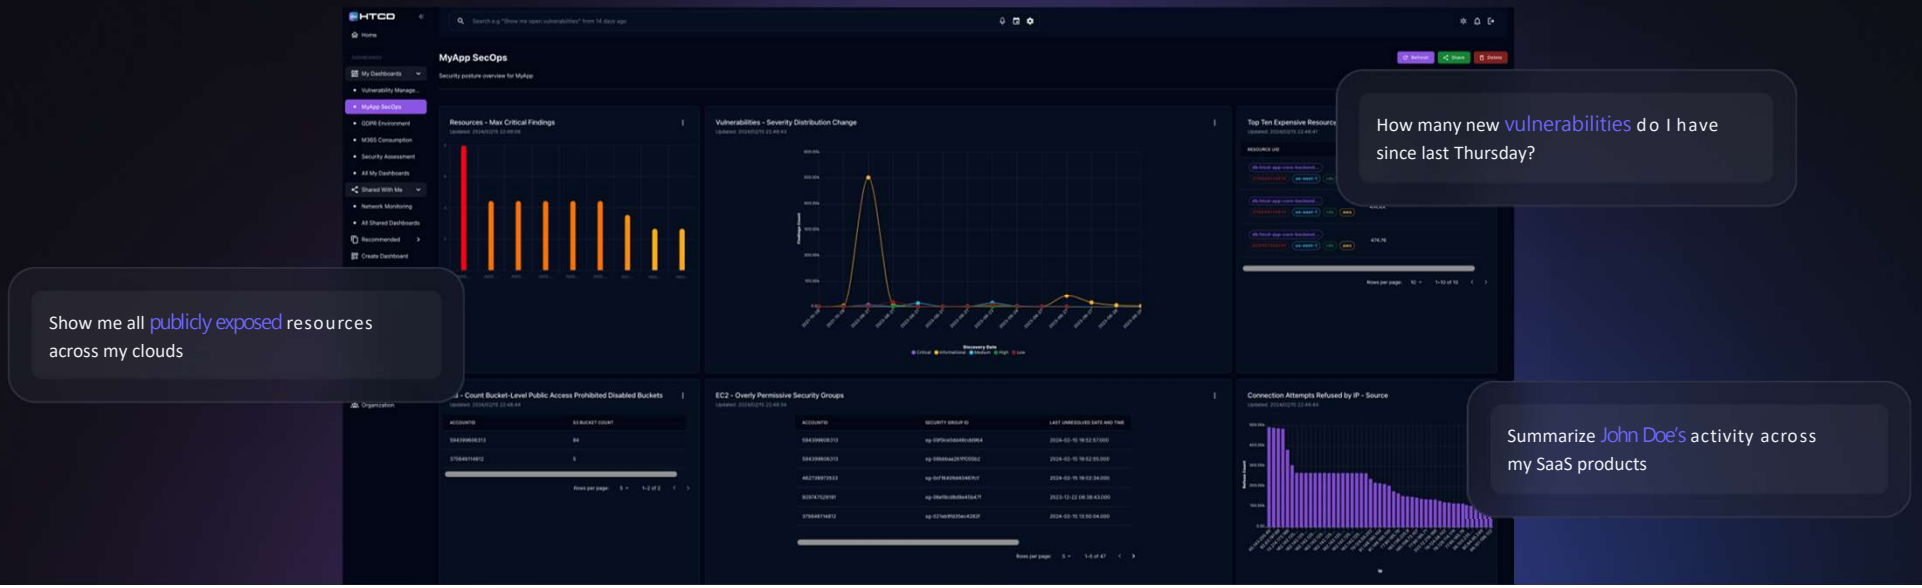
HTCD

Human Trusted Cyber Defense

Scale Your Cloud Security Team with an AI Workforce

Real-time Observability | Proactive Threat Hunting | Intelligent Prioritization

15 Minute Setup, Zero Data Retention, Zero Lock-In



Everyone Wants to Be on the Cloud

The Problem with Cloud Security Today

- Legacy security solutions fall short in the cloud
- Security today requires handing over security data to 3rd party vendors
- ‘Per GB’ and ‘Per Resource’ pricing is cost-prohibitive and opaque
- Set up is time and effort-intensive
- Operation requires expert knowledge and continuous training
