

Solution-as-a-Service

powered by Olympus

MESHSYSTEMS

Rapidly Deploy an IoT Solution in Under 30 Days

Mesh Systems' IoT Accelerator Engine, *Olympus*, removes the complexity of IoT solution development and **drastically reduces time-to-value**. With **no prior IoT expertise needed**, *Olympus* is the perfect fit for any stakeholder looking to kickstart an IoT initiative. Designed with scale in mind, our Accelerator Engine is purpose-built to fast-track your solution to production. Rather than building a solution from scratch, **focus on delivering business value** and let Mesh Systems take care of the rest.

Features & Benefits

Complete IoT Solution Tailored to a Process & Environment

Hardware (Sensors, Gateways)

Communications

Azure Cloud Infrastructure

Data Analysis Dashboards

Data Analysis in Power Platform

- Microsoft **PowerBI dashboard** is configured to the needs of the solution
- Data is **contextualized**, allowing business or operational users to derive insights from the data
- **Data Includes:**
 - Time-Series Data (*sensor data*)
 - Alerts (*historical log, notifications*)
 - Events (*historical log*)

Microsoft Teams Integration (Optional)

- **Collaboration**
 - Dedicated Teams channel to collaborate with Mesh Systems experts
- **Alerts**
- **Data Analysis**
 - Via imbedded Power Platform dashboards
