

SYNAPSE LINK INTEGRATION WITH MICROSOFT FABRIC

 **DataCrafters** |  **Microsoft**
Solutions Partner

Table of CONTENTS

01

Introduction

On our mission to simplify data management, leverage the power of your information for informed decision-making.

02

Start Crafting

Transform your data management processes today with Data Crafters' solutions.

03

Overcoming Challenges

Through strategic consulting, cost optimization, and technical expertise.

04

Contact Us

Through our dedicated communication channels and talk to our technology experts.

In today's data-driven environment, smoothly connecting various data sources is critical to gaining accurate insights and remaining competitive. We are dedicated to transforming how organizations manage and operate with their data. Our mission is to simplify data management so that organizations can make better decisions with:

Synapse Link for Fabric offering high performance and scalability for complex analytics on large datasets by seamlessly integrating Dataverse data into Microsoft Fabric.

Link to Fabric providing a simpler, cost-effective way to connect smaller datasets to Microsoft Fabric without additional storage or infrastructure.

Why Choose Us

-  Streamlined Analytics Delivery
-  Tailored Solutions with Built-In Quality
-  Proven Data Engineering Expertise

Getting Started with **SYNAPSE LINK & FABRIC**

We specialize in leveraging the power of Synapse Link to convert your Dynamics 365 data into actionable intelligence. Through seamless integration of your data with Azure Synapse, we empower organizations to make data-driven decisions faster and more effectively.

“It's essential to carefully consider the financial implications of adopting Synapse Link. As data volumes increase and refresh intervals shorten, Azure costs associated with Synapse Link can escalate significantly.”

To mitigate the rising costs associated with Synapse Link, we take a strategic approach. After careful consideration of data volume, refresh frequency, and storage options is crucial, we implement cost-effective storage solutions like Azure Data Lake Storage. This optimizes query performance and leverages cost-saving features within Azure that can significantly reduce expenses.

Overcoming DATA CHALLENGES

Data Crafters offers comprehensive Synapse Link solutions. From strategic planning to technical implementation, we optimize your data journey. Our expertise includes cost reduction through Azure Data Lake Storage, performance enhancement, and architectural optimization. We ensure seamless integration, real-time data updates, and maximum value from your data.

Integration Complexity

Overcome the hurdles of connecting disparate data sources with our streamlined approach.

Cost Constraints

Break free from the burden of high storage costs with our cost-effective solutions.

Data Latency

Eliminate the frustration of outdated data with our real-time synchronization capabilities.

Architectural Limitations

Optimize your data infrastructure by addressing architectural constraints.

Our pre-built DATA MODELS

Produce clear, comprehensible tables that power your reports, visualizations, and dashboards with our pre-built models. It helps define your project scope, allowing all your stakeholders to participate in the early design process, and gives a broad view of the information system.

Faster Delivery of Analytics

Accelerated delivery of comprehensive analytics.

Best Practices Framework

Framework-based approach with built-in data engineering best practices.

Data Quality Assurance

Embedded test cases to ensure data quality.

Customization Options

Customization options tailored to customer requirements.
