

## Noventiq's Microsoft Fabric 4-Week Proof of Concept

Unlock the Full Potential of Your Enterprise Data in Just One Month

### Microsoft Fabric: The Comprehensive Data Solution

Microsoft Fabric is a game-changing, unified data platform designed to address all enterprise data needs:

- Data Ingestion and Integration
- Scalable Storage Solutions
- Advanced Analytics and Machine Learning
- Real-time Data Processing
- Powerful Visualization Tools

As a Microsoft Fabric launch partner, Noventiq offers unparalleled expertise in implementing this transformative technology

### The Noventiq Advantage: 4-Week Proof of Concept

Our structured 4-week engagement is designed to demonstrate the tangible benefits of Microsoft Fabric for your organization:

**Rapid Deployment:**  
Experience the power of Microsoft Fabric in just one month

**Tailored Implementation:**  
Customized to your specific business objectives and data landscape

**Hands-On Expertise:**  
Guided by Noventiq's certified Microsoft Fabric specialists

**Minimal Disruption:**  
Seamless integration with your existing data infrastructure

**Scalable Foundation:**  
Build a robust base for future data initiatives

### Comprehensive Engagement Deliverables

**In-Depth Microsoft Fabric Training**

- Architecture deep-dive
- Feature exploration and best practices
- Data management and advanced analytics techniques

**Customized Platform Architecture**

- Tailored to your organization's unique data needs
- Seamless integration with existing systems
- Future-proof design for scalability

**Real-World Use Case Implementation**

- Pilot program using your actual datasets
- End-to-end implementation of a key business use case
- Custom Power BI dashboards for actionable insights

**Strategic Documentation and Roadmap**

- Detailed integration and architecture documentation
- Best practices for governance and administration
- Strategic roadmap for scaling and optimization

**Ongoing Support and Knowledge Transfer**

- Post-implementation support
- In-depth training for your data team
- Resources for independent platform management

### Engagement Structure: A Four-Week Journey to Data Excellence

Phase	Focus	Key Activities and Outcomes
Pre-Engagement	Assessment & Planning	<ul style="list-style-type: none"> <li>• Comprehensive evaluation of current data architecture</li> <li>• Identification of key business challenges and opportunities</li> <li>• Alignment of Microsoft Fabric capabilities with organizational goals</li> </ul>

Week 1

## Foundation & Strategy

- In-depth introduction to Microsoft Fabric architecture and features
- Collaborative workshops to identify critical datasets and use cases
- Development of a tailored implementation strategy

Week 2-3

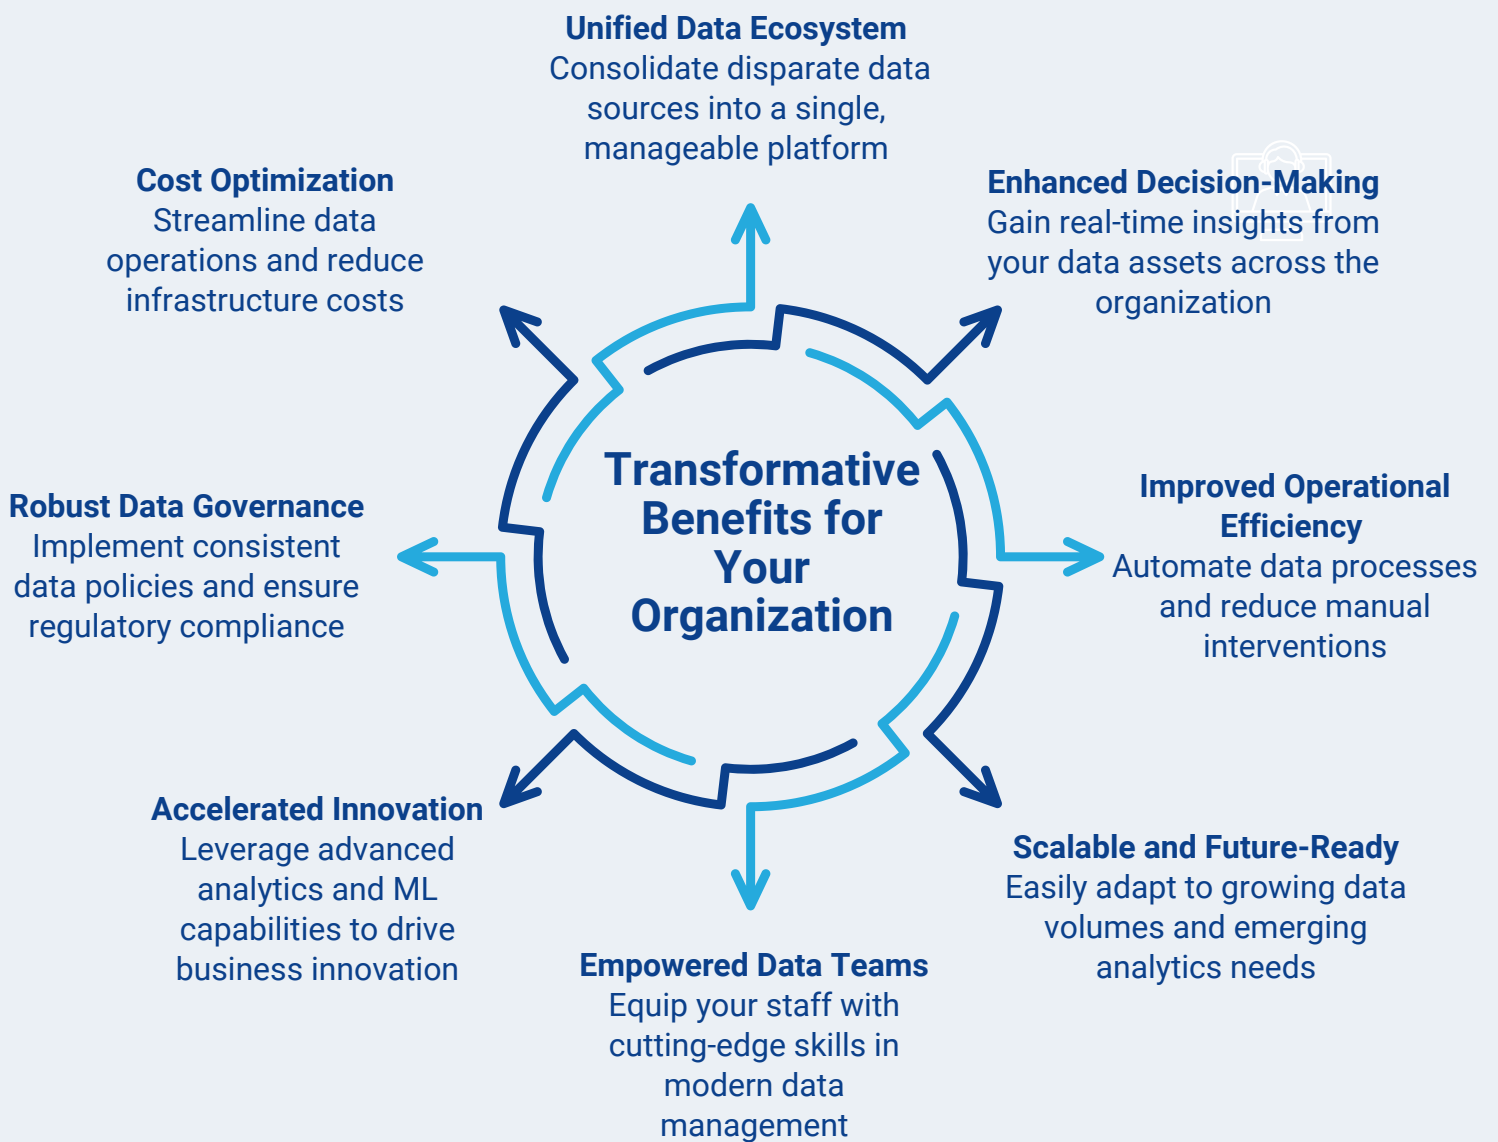

## Pilot Implementation

- Setup and configuration of Microsoft Fabric environment
- Data ingestion and transformation using advanced tools (pipelines, notebooks, dataflows)
- Development of Power BI reports showcasing data-driven insights

Week 4

## Refinement & Expansion

- Fine-tuning of the pilot based on stakeholder feedback
- Advanced training on governance, administration, and best practices
- Delivery of comprehensive documentation and future roadmap

## Investment in Your Data Future

**\$18,000 for the complete 4-week Proof of Concept engagement**

### This investment provides:

Hands-on experience with Microsoft Fabric

Tangible results from a real-world use case implementation

A strategic roadmap for full-scale adoption

Long-term value through enhanced data capabilities

**Embark on Your Data Transformation Journey**

**Don't let fragmented data hinder your business growth. Embrace the future of data management with Microsoft Fabric and Noventiq.**
