

# Securing Your Hybrid Cloud

Moving resources to the cloud changes your security needs

**Most security decision makers estimate that more than 75% of their organizations' workloads will move to the cloud.**

B&R Business Solutions recognizes that digital transformation enables enterprises to innovate faster, which is why so many organizations continue to move to the cloud. But cloud migrations also come with challenges, such as how to integrate and standardize security for on-premises assets and those in 3<sup>rd</sup> party cloud providers.

B&R Business Solutions can guide you in this process by leveraging the security and extensibility of the Microsoft 365 Defender suite, combined with infinitely scalable Azure services to create a solution that will meet your security and compliance requirements.

Moving resources to the cloud changes your security needs

Free briefing and design consultation

Let our security architects show you what's possible and discuss ways you can secure and monitor your digital estate, from your on-premises servers to your Azure resources, using Microsoft Defender for Cloud.

Reduce risk with  
contextual  
security insights

Prevent, detect, and  
respond to threats

Improve communication  
and share visibility  
between development  
and security teams

## Why B&R Business Solutions?

B&R Business Solutions has been a Microsoft partner for over 20 years, providing innovative solutions that meet even the most unique business challenges, with a focus on architecting, implementing, integrating, developing, and supporting solutions built on Microsoft 365, Azure, and related technologies. For any sized business, B&R can utilize the skills and expertise of its team members to find the right solution – the first time – and deliver it in a manner that exceeds all expectations.

B&R holds Solutions Designations in three Microsoft solution areas:

- Modern Work
- Infrastructure
- Digital & App Innovation
