# Why do you need an industrial data hub?

Delivering industrial DataOps and enabling agility and ownership

## Industrial DataOps

Connects to a variety of OT, ET and IT data sources. Provides scalable capabilities for data transformation, contextualization and modeling.

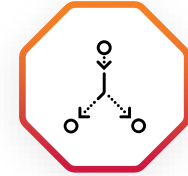

## Industrial Data Product

Enables building industrial data products with essential capabilities for accessing, manipulating and deriving insights from industrial data.

## Domain Ownership

Decentralizes the ownership of industrial data to the domain closest to the data.

## Federated, Decentralized Data Governance

Promotes the accountability of OT functions with more independence and less overhead.

# Industrial DataOps unlocks transformation value for industrial enterprises

**20 – 30% reduction in maintenance costs**

**50 – 60% improvement in worker productivity**

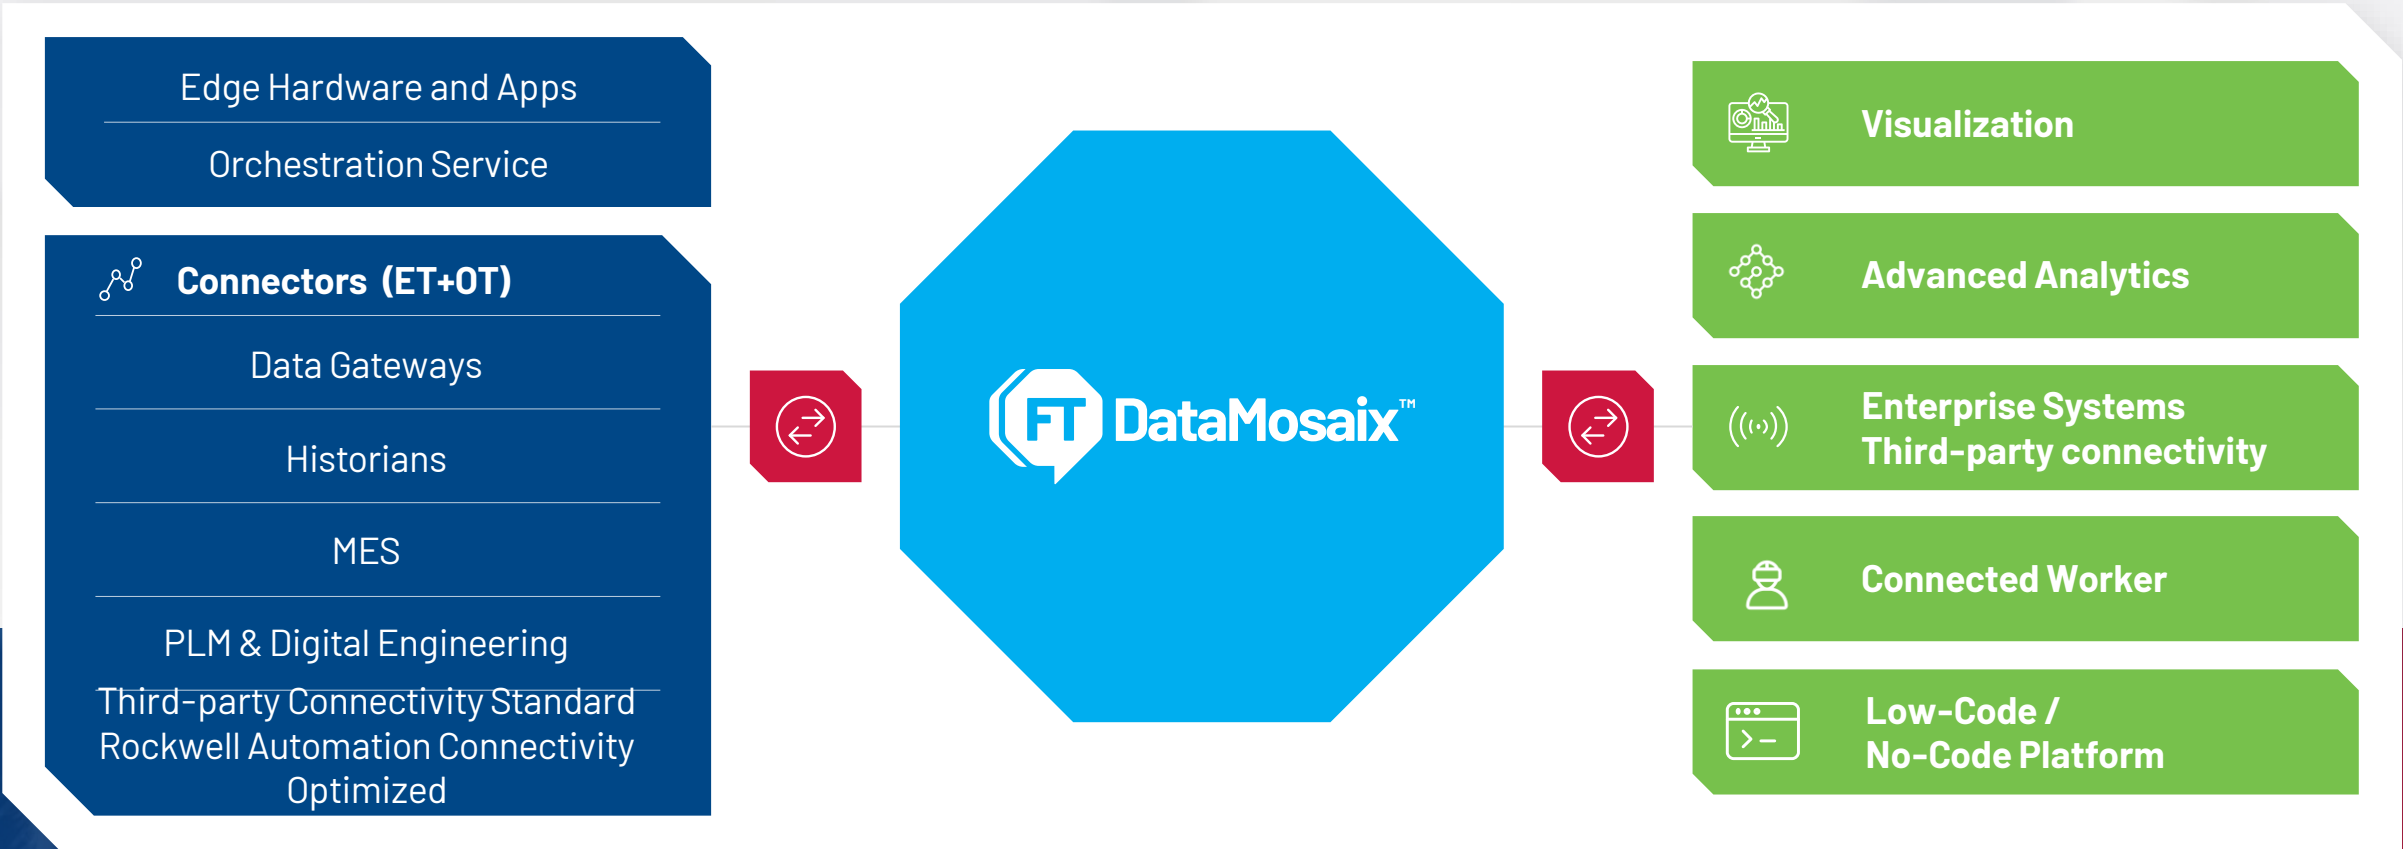

**5 – 8% reduction in asset downtime**

\*Results based on previous deployments

# Introducing FactoryTalk® DataMosaix™

Transform your data into value with a SaaS Industrial Data Hub

Thank you
