Seamlessly migrate Slack (Free / Pro / Business+) to MS Teams

Overview

AVAMIGRATRON's Slack (Free / Pro / Business+) migration product is a comprehensive solution designed to simplify and streamline the migration process. Leveraging advanced migration techniques, we ensure a smooth transfer of messages, attachments, channels, and more, preserving the integrity and structure of your data. With our expertise, you can seamlessly transition to MS Teams without any disruptions.

Key Features

✦ **Supported features include**

- Channels & Chats - Migrate all channels and chats along with messages.
- Threads & Mentions - Transfer threaded conversations and mentions with datetime stamp and user information.
- Links & Emoji's - Preserve shared links and emojis to maintain context.

✦ **Real-time Monitoring**

Monitor migration progress in real-time with detailed reporting.

✦ **Data Integrity & Retention**

Zero data loss, keeping original creation and modification dates.

✦ **Initial & Incremental Migration**

Flexibility for first and incremental migration to suit requirements.

✦ **Parallel Migration**

Simultaneous execution of multiple migration processes for efficiency.

✦ **User & Permission Mapping**

Accurate mapping and migration of user details and permissions.

✦ **Archived User Details Migration**

Comprehensive migration of archived/inactive user details.

✦ **Schedule Migration**

Effortlessly plan and schedule your migration for seamless execution.

Deliverables

Access to application user guide and tour videos designed to assist you throughout the migration journey.

Providing AVAMIGRATRON tool license configuration for seamless setup and utilization.

Contact information and procedures for technical support related to product setup and initial configuration.

A comprehensive migration report and detailed assessment report detailing the migration process and outcomes.
