

KONICA MINOLTA

ENHANCE YOUR IDENTITY SECURITY

Nowadays, many organizations have their workforce spread across the world, often operating in a hybrid or remote setup. This opens the organization to threats, especially if its only form of access control is through passwords. Azure MFA becomes a key component in enabling an organization to boost its security posture. Once implemented, Azure MFA will enable the organization to add additional layers of security in the form of push notifications, One-Time Passwords, location, device type and more.

YOUR PARTNER FOR ALL THINGS TECH

From developing effective IT strategies to addressing specific areas ranging from modernizing systems to cybersecurity, our team of experts has guided thousands of clients throughout North America in reaching their full potential in today's digital world. Contact our team of consultants to see how they can help you overcome your technology issues with ease and confidence.
