lumifi

Lumifi MDR with Microsoft Defender

Service Description

Lumifi is a leading cybersecurity company that protects organizations by providing complex forensic cyber security services leveraging Microsoft Defender. Lumifi stands out among our competitors as a true Monitoring Detection and Response (MDR) provider that delivers world-class results with white-glove service and a consultative approach.

Microsoft Defender is a cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.

1.2B Devices scanned each month

Features

- Monitor users, entity behavior, and activities with learning-based analytics
- Identify suspicious user and device activity with both known-technique detection & behavioral analytics
- Analyze threat intelligence from the cloud and on-premises
- Protect user identities and credentials stored in Active Directory
- View clear attack information on a simple timeline for fast triage
- Provide clear incident information on a simple timeline for fast triage
- Monitor multiple entry points through integration with Microsoft Defender.
