

Digitally transform your organization with Nintex Automation Cloud

Is your organization mired in broken, manual processes?

Left unautomated, business-critical processes can result in high labor costs, low productivity and inefficiency, data errors, customer response delays, inability to scale, and reduced competitiveness.

You need an easy way to automate processes, without having to depend on IT. You need Nintex Automation Cloud.

Simple, powerful process automation

Experience the easiest to use, most powerful workflow automation software available today to automate and orchestrate all your business processes for lower costs, faster operations, and happier customers and employees.

Build advanced workflows in minutes that progress tasks and talk with enterprise systems—with clicks, not code.

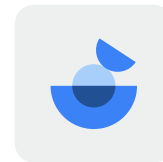

Intuitive

Drag-and-drop visual design tools make it easy to visualize and automate even the most sophisticated processes. Go from concept to deployment in days, not weeks or months.

Integrated

Quickly deploy automated workflows across systems of record, content repositories, and communication channels that are crucial to your business.

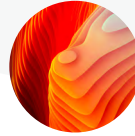

Comprehensive

Automate every step of complex, end-to-end business processes with integrated components for forms automation, robotic process automation, document generation, and e-signature.

Delivering benefits to:

Functional and C-level leaders

- **Wring out cost and time;** operate more cost effectively and profitably
- **Scale the business** without adding headcount by operating more efficiently
- **Boost data accuracy and response times** to ensure compliance

Operations leaders and Process pros

- **Meet cost and productivity goals** without adding headcount
- **Delight your customers** by completing the process faster with existing resources

IT leaders

- **Empower the business** to build forms and workflows so you don't have to
- **Connect workflow across legacy systems,** without costly changes or integrations

Common use cases:

- Citizen services
- Order-to-cash
- Service & support
- Document & contract creation
- Employee hire-to-retain
- CRM lead-to-order
- Case management
- Risk & regulatory compliance
- Claims processing

Key capabilities

Forms, Mobile

Create dynamic online forms to capture and submit accurate and current data from wherever you are, on any device

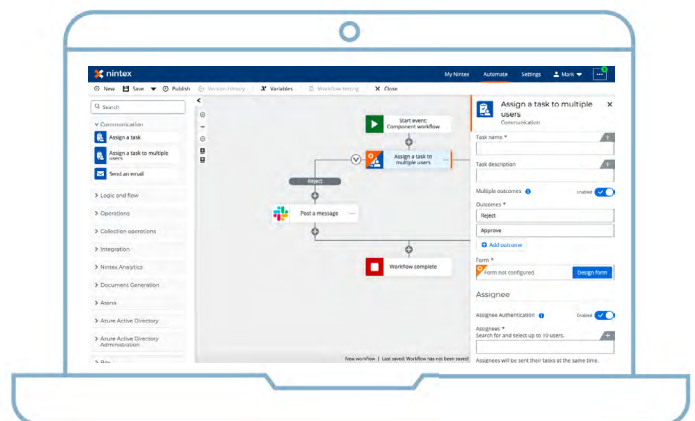

- Quickly and easily build and customize your form with no coding required
- Submit a form where you are, on any device, so data is always collected
- Enable authentication option to improve governance and usage of your form
- Leverage rules and formula-builder to further customize your form

Workflow

Powerful and easy-to-use workflow automation to streamline the processes that make up the core of your business

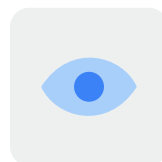

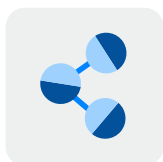

- Intuitive, drag-and-drop visual design canvas with no coding required
- Quickly deploy automated workflows across business
- Connect to your existing business systems (Salesforce, Google, Microsoft, Legacy on-prem, and more)
- End-to-end automation, integrating process mapping, document generation, RPA and e-signature capability within workflow
- Fast time-to-value; lowest total cost of ownership

Zoom Video Communications, Inc.

AUTOMATED CHANNEL ORDERING PROCESS TO SUPPORT AN UNPRECEDENTED DEMAND

When COVID-19 hit, demand for video communication services skyrocketed. Processing and tracking new channel orders had already been a challenge for Zoom, even before the surge in business. Zoom needed to replace its largely manual order tracking and management process with an automation solution that could integrate with Zendesk and Salesforce. In just three weeks, Zoom implemented a solution built on Nintex Automation Cloud, to automate the steps from order intake through purchase-order confirmation and provisioning on Zendesk and Salesforce.

RESULTS

The Nintex solution was fully operational in three weeks and handles 90% of orders, allowing Zoom's channel business to keep up with soaring demand.

National Gallery of Singapore

DIGITIZED VISITOR REGISTRATION PROCESS TO SUPPORT HEALTH, SAFETY AND SECURITY OF VISITORS TO THE GALLERY

The Gallery's IT team worked with SRKK, a Nintex Partner, to swiftly implement a digital visitor registration form with Nintex Automation Cloud. Visitors to the Gallery sign-in via an anonymous form accessible from their mobile device. Once submitted, all details are recorded in a SharePoint online list, and any responses meeting flagged parameters are escalated to the museum's security team.

RESULTS

Three days to build, test and implement automated workflow solution; 50K+ visitors' information captured while protecting health and safety; see workflow in the Nintex Process Accelerator Gallery.

Trinity Grammar School

AUTOMATED STUDENT ROLL CALL PROCESS TO SUPPORT REMOTE LEARNING

When the COVID-19 pandemic led to widespread lockdowns in early March 2020, Trinity pivoted quickly to its remote learning program. Working from home, students engaged with teachers, undertook online coursework and interacted with their peers. As part of this transition, the school needed to swiftly and accurately check attendance to ensure students were participating in online activities each day. Supported by Synergy, the ICT team created an attendance registration form on Nintex Automation Cloud that connects with the school system's Microsoft SQL database.

RESULTS

New system was fully operational in just two days; 30K+ student attendance records made virtual in four weeks; easily integrated with learning management platform.

BNBuilders

AUTOMATED DAILY JOB SITE ENSURES SAFETY AND SUPPORTS CONTACT TRACING DURING COVID-19 PANDEMIC

Based on CDC recommendations, the daily check-in form would allow the company's crisis and safety teams to monitor the risk of possible virus exposure and enable contact tracing if required. BNBuilders needed to implement a solution that could quickly scale across its 150 active job sites each month. Leveraging Nintex Automation Cloud, BNBuilders rapidly built a digital form and workflow solution to record all visitors to job sites and offices.

RESULTS

One day to build automated process; 28K unique form submissions in the first two months.
