

QUICKLY REDUCE RISK AND ENABLE COMPLIANCE CONTROLS

with eGroup Enabling Technologies and the Purview Fundamentals Workshop

Microsoft Purview provides a full suite of governance, risk, and compliance controls. It efficiently identifies critical and sensitive data so that policies and controls can quickly be applied to provide visibility, protection, and reduce risk.

Purview is complex and the solutions can be challenging to roll out on your own. Engage the eGroup Enabling Technologies team to receive a packaged service providing an overview and introductory configuration to envision and start gaining value from Purview.

WORKSHOP PROCESS

Provide an overview and demonstration of core Purview solutions

Catalog and review a set of sensitive data locations

Create a set of baseline configurations:
Data Loss Prevention, Data Lifecycle Management,
Information Protection

Discuss strategies and methods to operationalize Purview in production

Create as-built documentation and guidance to bring the solutions into production

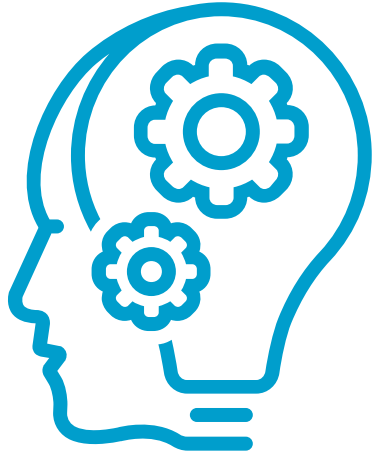

YOU'LL RECEIVE:

A DOCUMENTED SET
OF BASELINE
CONFIGURATIONS

TRAINING ON PURVIEW
FUNCTIONALITY AND
ADMINISTRATION

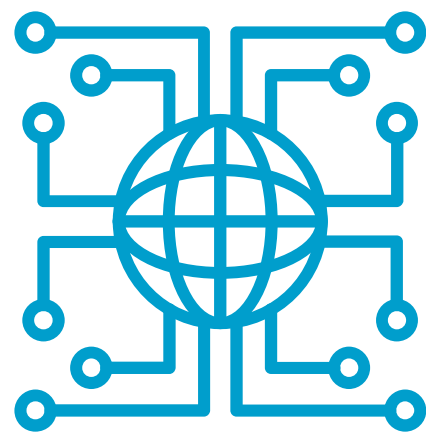

KNOWLEDGE AND PLANNING
TO EXPAND THE BASELINE
IMPLEMENTATION

OUTCOMES

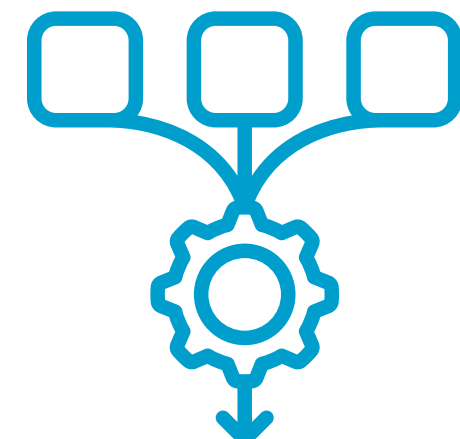

UNDERSTANDING

An overall understanding of the functionality and benefits of Purview

FAMILIARITY

Familiarity with Compliance Manager and Insider Risk Management

A HEADSTART

Baseline settings to be activated and enforced as desired

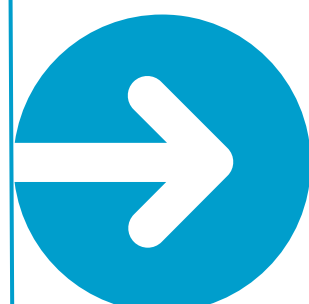

“We looked for partners locally and across the US. They were on their game and knew what they were talking about. We had a high level of confidence coming away from our conversations. They did a tremendous job in planning and educating us to make sure the decisions made were right. You could tell from the conversation that the guys at Enabling really understood, specialized, and had confidence in their abilities to help us. You can only rise to the level your partners can take you to. They kept all promises, did what they said they were going to do, and you can't ask for anything more than that from a partner.”

Cory Staheli, CIO, Trans-System

WHEN IT COMES TO SECURITY, WHY NOT ENLIST AN EXPERIENCED PARTNER?

eGroup Enabling Technologies is a 9x Microsoft Partner of the Year award winner. Our engineers have worked with Microsoft's security stack for almost a decade. We manage threat vectors through AAD, Defender, Sentinel, and on-prem OS security.
