

## Solution Review

An offering to ensure that your requirements to your MDM system are met

## Scope

The Solution Review will be conducted by an experienced Stibo Systems Professional Services team. The work will be conducted remotely and/or onsite with your team at the agreed milestones. The review service covers areas of key importance such as:

- Confirming that solution design and build are future-proof, scalable and maintainable based on current business requirements
- Verifying that design and build follow STEP standards and good practice
- Confirming architectural requirements' fulfillment
- Validating integration design and build
- Confirming non-functional requirements are covered
- Identifying potential solution risks and providing mitigation recommendations

## Contribution

In order to unlock the full potential of the Solution Review, it needs to be a joint exercise with experienced people on both sides. Stibo Systems will bring in expertise of highly skilled people and interview expert resources from your team in the following areas:

- MDM program lead
- MDM and business area subject matter experts
- MDM implementation team

Beside the interview, the Stibo Systems team needs to get access to the following artifacts:

- Business use case and requirements
- Solution architecture overview
- Design specifications
- Implemented MDM solution

**PURPOSE:** The main purpose of the Solution Review is to give you feedback on the current MDM implementation, how it matches Stibo Systems' good practice and your requirements. The feedback includes potential challenges or risks, as well as their severity. It also includes recommendations on how to deal with them.

Ensuring that your functional and non-functional requirements to your MDM system are met.

**BENEFITS:** The recommendations will help you get an insight into your current implementation and highlight potential areas of improvement to maximize the value of your investment.

**TIME FRAME:** The review service activities will be planned alongside the solution design and build and are as such dependent on the actual schedule.

## Stibo Systems deliverables

The resulting report contains the findings, their potential impact or risks and recommendations on how to deal with them.

If you want to know more about this offering, please reach out to your Stibo Systems contact person.

## About Stibo Systems

Stibo Systems is the leading enabler of data transparency through master data management and data syndication. Built on an open platform with scalable, cloud-native SaaS technology, our solutions empower many of the largest and most innovative global companies with better data quality and visibility. This creates a trusted data foundation for enhancing operational efficiency, making informed decisions, delivering superior customer experiences and supporting sustainability initiatives. Headquartered in Aarhus, Denmark, Stibo Systems is a privately held subsidiary of Stibo Software Group, which guarantees the long-term perspective of the business through foundational ownership.
