

Solution Brief

AI Design Fast Package Workshop

Define your roadmap to leverage the power of Generative AI and Classic AI for proven outcomes.

Business challenge

Many technologies and business processes are incorporating generative AI — creating new opportunities for success. However, several new challenges are emerging that may prevent organizations from realizing their potential. These include:

- Long duration and high cost of development
- Difficulty proving ROI and effectiveness
- Applicability to the business
- Data readiness
- Security and maintenance considerations and costs

How we help

In the AI Design Fast Package Workshop, Insight experts work with you to:

- Understand the current state of your organization's use cases in AI
- Identify the most important use case to get you started on your journey
- Determine AI readiness for your organization
- Assess your data and security needs for your environment
- Build a roadmap to accelerate your path to business value

Accelerated transformation across industries

Insight's differentiated IP and approach will help you solve complicated business challenges and accelerate the delivery of real business value. Our fast packages are born out of real work with measurable ROI and have multiple applications across industries.
