

Infosys One Click API

The Governed API Lifecycle
Manager

Do you have these challenges in your enterprise as part of implementing and managing APIs?

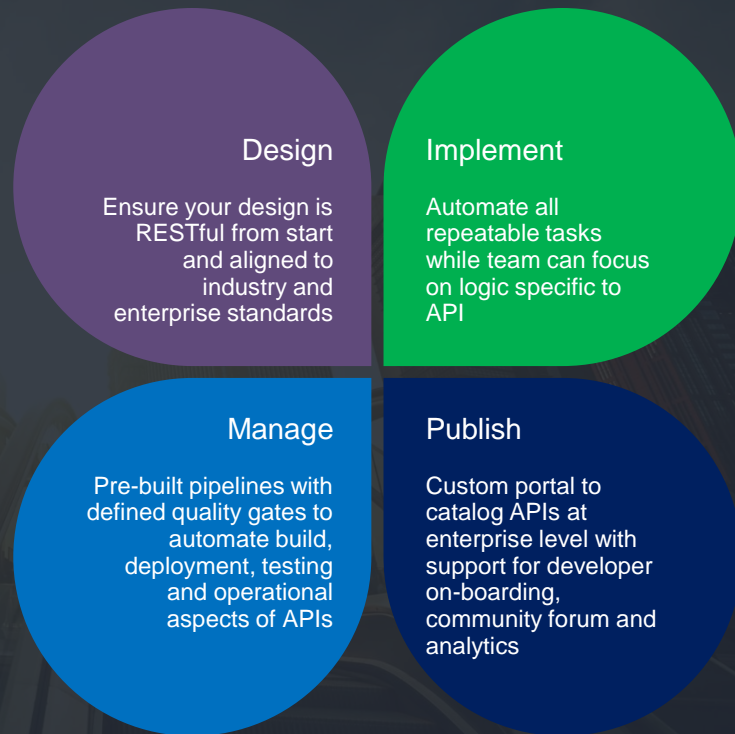

Infosys One Click API automation solution helps to address all these challenges along with bringing in several additional value adds to the enterprises in their API journey.

Why One Click API?

One Click API is an extreme automation solution which provides a standardized and governed platform at enterprise level for different teams to implement APIs with high quality, faster time to market and reduced cost while adhering to enterprise standards and industry best practices.

One Click API supports API governance with –

- Multiple API gateways
- Centralized developer portal across gateways
- Multiple teams
- Multiple tools for CICD and DevOps

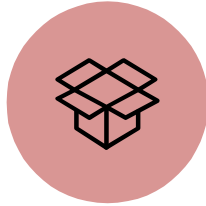

Key highlights

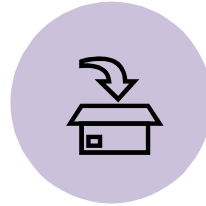

Leveraging One Click API helps both enterprises starting newly on their API journey as well as those with already implemented APIs across different methodologies to establish a governed and standardized approach for building and managing APIs.

COE Setup with E2E API
Governance in < 2
weeks

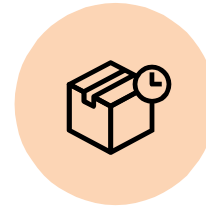

50%+ savings in API
implementation
timelines

75%+ reduction in
defects

50%+ Cost Savings
through custom portal
and automations

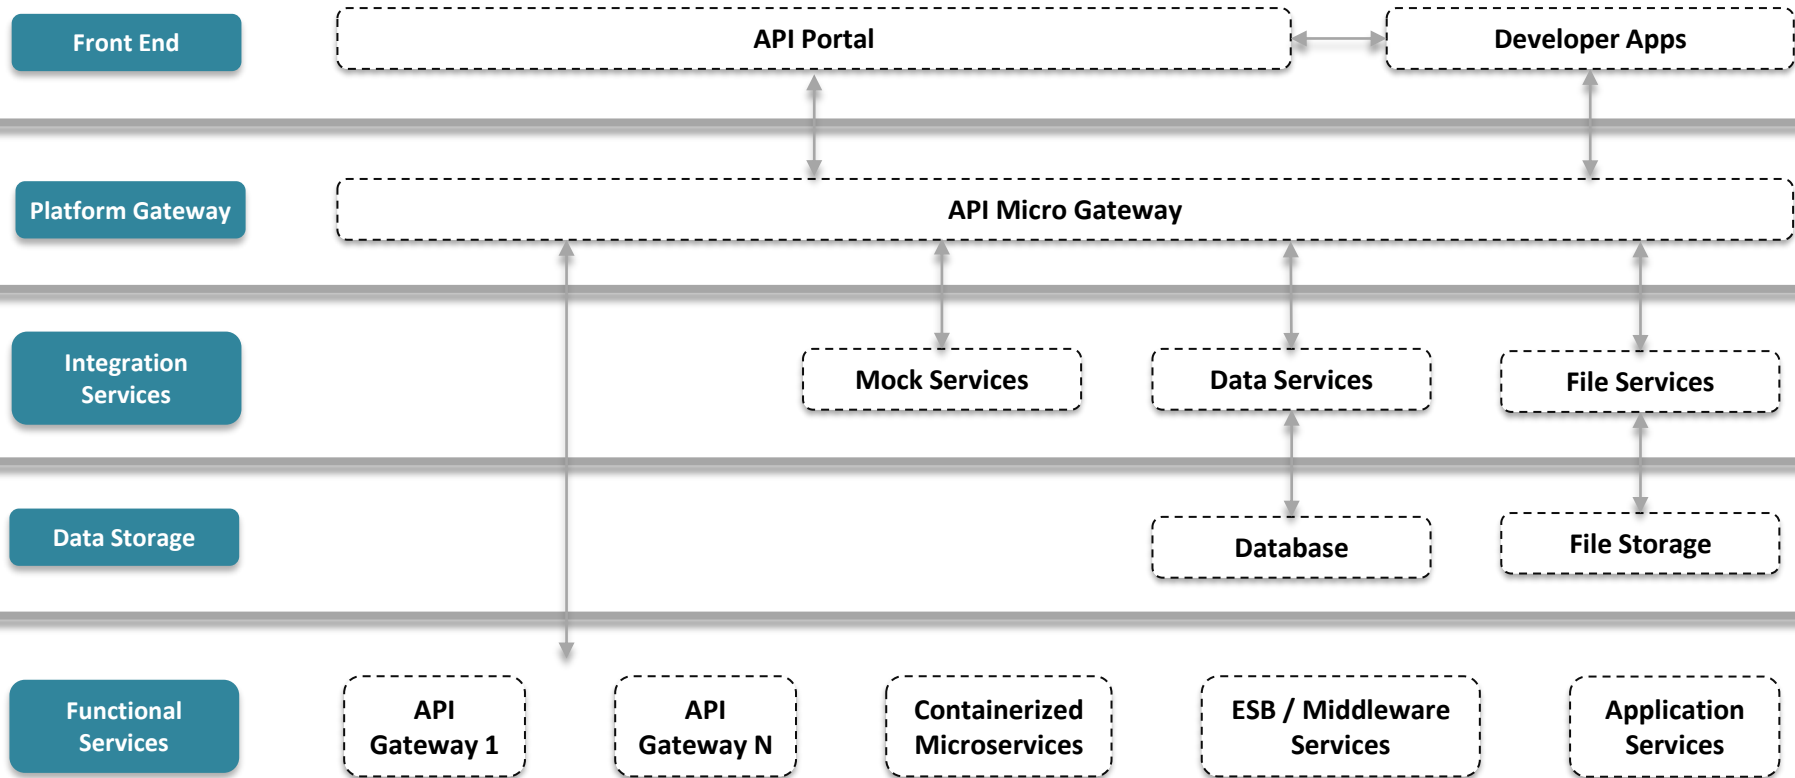

Release APIs to prod in
Days

...and the benefits and savings keep increasing over
time with more APIs and teams
