

Green Project's Click to Decarbonize

Achieve Your Scope 3 Goals with One-Click Renewable Energy Procurement

Reducing supply chain emissions can be challenging. Ensuring your suppliers can effectively access sustainability solutions is particularly difficult due to limited market access, inconsistent data, and varying levels of procurement expertise.

Our holistic Click to Decarbonize dashboard removes these barriers by enabling your suppliers to purchase high-quality Energy Attribute Certificates (EACs) with ease.

How Click to Decarbonize Powers Your Success

Simplify EAC Procurement

Enable your small and mid-sized suppliers to enter renewable energy markets by providing the education and assistance they need to make informed EAC purchases.

Monitor Suppliers' Decarbonization Efforts

Access charts that track each supplier's EAC purchases over time and illustrate their impact on your Scope 3 footprint, delivering clear insights into trends and performance.

Provide High-Quality Products

Ensure that your suppliers procure top-tier EACs while they align their emission reduction strategies with your organization's sustainability goals.

Stay Ahead of Regulatory Requirements

Get the guidance and tools you need to adhere to global standards and frameworks. By staying informed and prepared, you can effectively avoid penalties and navigate regulatory changes with confidence.

Our Proven Approach to Supply Chain Decarbonization

Through our Click to Decarbonize dashboard, we offer a collaborative platform that equips your suppliers with the necessary tools and guidance to efficiently procure EACs. We also provide them with tailored education and ongoing support to reduce their Scope 1 and 2 emissions, which in turn lowers your Scope 3 emissions.

Built to Scale, Designed for Impact

Our dashboard's robust features ensure that your suppliers can scale their decarbonization efforts effectively:

Integrated Facilities Data

Seamlessly incorporate facilities data into your emissions tracking, providing a complete and accurate picture of your supply chain's environmental impact.

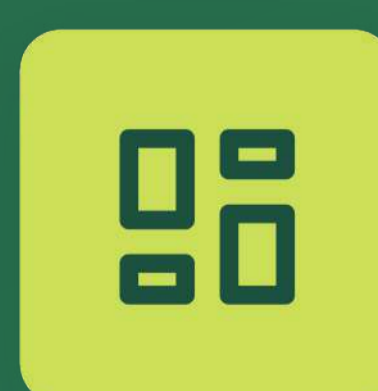

Automated Retirement Statements

Automatically generate and manage EAC retirement statements, ensuring accurate and hassle-free reporting.

Alignment with SBTi and Major Frameworks

Guarantee all EAC purchases align with the Science-Based Targets initiative (SBTi) and other major reporting frameworks, simplifying your compliance efforts.

Consolidated Dashboard

Gain a comprehensive view of suppliers' decarbonization progress, enabling you to effectively track your Scope 3 emissions reduction efforts.
