

GenAI-Powered HR Assistant

Empowering HR with AI-driven Conversations.

Even though organizational policies on employee benefits and facilities are meticulously documented, their volume makes employees still inquiring to HR for clarifications. This takes considerable HR bandwidth and impacts overall efficiency of the department. That's where Accellor's GenAI-Powered HR Assistant comes in.

Accellor's GenAI-Powered HR Assistant empowers organizations to optimize operations, enhance employee experiences, and drive productivity.

Key Features

- 1 Insights:** Gain valuable insights into time and cost savings for HRBPs, allowing process improvements from query insights.
- 2 Plug & Play Use Cases:** Automate answers to FAQs about compensation, leave status & policy, performance, benefits & many more.
- 3 Access within MS Teams:** Access HR support without leaving the Microsoft MSFT Teams, enhancing efficiency and collaboration.
- 4 Seamless Integration with HRM system:** Seamlessly integrate with HR systems like SAP HCM, Workday and more.
- 5 Secure & Privacy:** Ensure data security and privacy with role-based access control and stringent security measures.
- 6 Scale:** From onboarding new hires to managing ongoing HR tasks, our solution manages thousands of employees with minimal effort.

Benefits

- ✓ **Save HR Bandwidth:** Automate responses to common queries, allowing HR teams to focus on strategic initiatives.
- ✓ **Personalized Employee Experience:** Tailor interactions with each employee, enhancing engagement and satisfaction.
- ✓ **Ensure Version Control:** Always provide up-to-date information by uploading latest documents to only one place.
