

# .NET App Modernization in-a-day

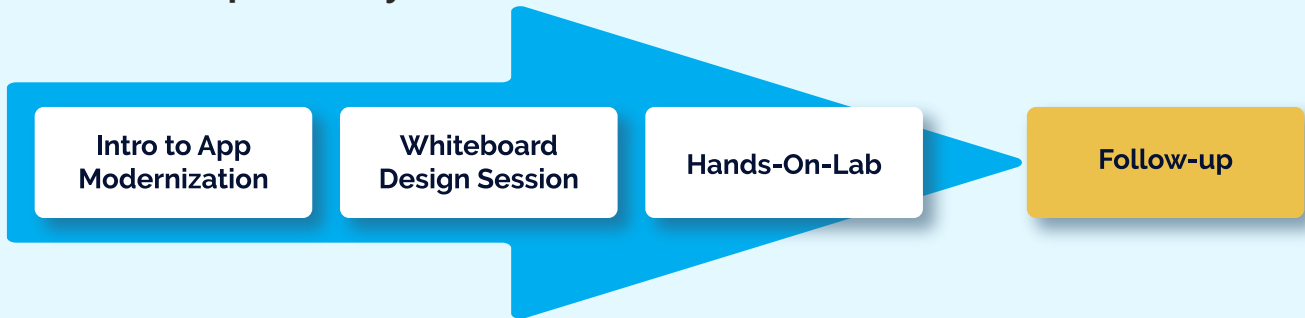

Are you ready for **Microsoft Azure**?

Learn with our experts how to approach the modernization of your existing applications.

**Get inspired!**

## Modernization steps in-a-day

## Azure Workshop Content

Our experts at DAENET will lead you for a day and guide you how to approach your cloud modernization projects.

The “Azure Cloud Workshop: .NET App Modernization in-a-day” provides you with the fundamental knowledge you need to successfully modernize your .NET applications and migrate them to the cloud. In this workshop we evaluate a demo solution and prepare it for the migration to Azure.

You get to know different approaches and Azure services that help you to modernize your application.

Together with our experts we walk through a step-by-step-method and find the optimal solution and migrate the relevant application.

You want to continue your Azure cloud journey and need more expert support? An individual follow-up session will guarantee your successful realization.
