

# Is **your Business** geared to meet the demands of a **Disruptive Era?**

We enable our customers to use disruptive technologies to get ahead of the game

## **WE DESIGN** transformational solutions to

- Enhance customer experience
- Adopt new business models
- Build a modern workplace
- Drive profitable growth

## **USE DISRUPTION** to your advantage

Success in today's disruptive era belongs to enterprises that transform, accelerate and optimize their IT environment for business agility and to enhance customer experiences.

Our IT strategies and services are designed to enhance IT agility to address the needs of digital businesses. We enable enterprises to adopt digital transformation to seize the abundance of economic possibilities, by rethinking business models, operations and customer relationships.

# Service Offerings

consulting, design, development, implementation, support and managed services

- Application Development
- Artificial Intelligence
- Automation
- BI & Analytics
- Big Data
- Block Chain
- Cloud Services
- Infrastructure Services
- Internet of Things
- Mobility
- Product Engineering
- QA & Testing

## Disruptive Services

We help our customers build smarter products; gain actionable intelligent insights and achieve better business outcomes by leveraging disruptive technologies like AI, Automation, Big Data, Blockchain, DevOps, and IoT.

## Product Engineering

Our cloud-first technology solutions and services are designed to support the transformational needs of global technology companies in a race to gain competitive, proprietary advantage.

## Application Development & Modernization

We empower clients to leverage the Cloud for business agility and cost efficiency. We architect or re-engineer applications to be modular, scalable, fault tolerant and ultra-responsive.

- Reduce time to market
- Reduce defects by up to 60%

- Improve customer support, cut response times
- Increase IT productivity and business agility

## Mobility

We architect and build comprehensive mobility solutions to empower you with seamless ecosystems that transcend distances, devices, and distribution models.

## Infrastructure Services

Unleash the power of modern, intelligent infrastructure and transform your business. We help you to build highly-agile, scalable and responsive IT infrastructure.

### Intelligent Digital Infrastructure

Data Center						
Network						
Workplace						
Security						
Operations						

## QA & Testing

Our manual, automation, performance, security and next-gen testing services, backed by techno-functional experts, domain knowledge, and proven test methodologies, ensure superior software quality by introducing testing early in the software development life cycle.

### The Cost of a Bug Fix

## BI & Analytics

Our Business Intelligence service helps organizations to collate relevant disparate data into data warehouses and build dashboards for visualization. This empowers users to analyze and derive useful business insights.

## Cloud Services

Our cloud-first strategy enables you to improve business velocity to exceed customer expectations.

### Transform

Be future-ready with apt cloud strategy. Leap to higher cloud maturity for better KPIs.

### Migrate

Design optimal migration path for your unique business scenario – Rehost, Replatform, Refactor, Re-architect.

### Development

Rapidly deliver native and hybrid cloud applications at scale in highly available environment.

### Architecture

Harness the power of new-age cloud architecture – Serverless, Containerization and Microservices.

### Support

Support complex enterprise applications and IT portfolio.

## Industries we serve

BFSI

Education

Healthcare

High-Tech

Manufacturing

Transportation  
& Logistics

## Value we delivered

**2 Million**

school children tracked

Ensured parents peace of mind, securing one child at a time.

**200 Million**

hectoliters of beer produced/year

Increased sales via Communication & Collaboration platform.

**34%**

data access by employees

Anytime, anywhere access via mobile apps.

“ **We've been working with Trigent since 2001, building, maintaining, and improving the bill of materials system. Trigent rewrote the existing program and developed an algorithm and custom inventory system and over the years continues to provide, unsurpassed quality and support.**

– Tom Gidley, Process Information Officer, Navistar

Trigent, a global technology solutions company, enables organizations to adopt digital processes and customer engagement models to achieve outstanding results and end-user experiences. Trigent helps clients achieve this through enterprise-wide digital transformation, modernization, and optimization of their IT environment. Trigent's decades of experience, deep domain knowledge, and technology expertise delivers transformational solutions to ISVs, SMBs, and enterprises in Transportation & Logistics, Healthcare, Manufacturing, Financial Services & Insurance, High-Tech, and Education sectors. Trigent offers a complete set of IT services from consulting to design, development, and managed services across Infrastructure, Cloud Services, Mobility, BI, Analytics, Product Engineering, QA & Testing, IoT, Big Data, and Artificial Intelligence.
