Take Action Against Cyber Attacks

Is your information protected from cyber criminals? Do you have a plan of action should an unauthorized user access your credentials? Are you following privacy and compliance policies? If not, your cloud services, including your email, critical files, devices, and identity may be at risk.

Get a Security Action Plan

Take action to improve your Azure and Office 365 security. We can create a customized report and plan of action that aligns with your cloud adoption strategy. Vorsite's Azure and Office 365 security assessment follows a proven process with the end goal of providing an actionable Azure and Office 365 security implementation plan.

Our Action Plans Can:

- Offer peace-of mind, knowing your data is protected

- Reduce your risk, saving you time and money in the long-run

- Leave you with a clear-cut security roadmap

Thorough Assessments

- Complete risk evaluations that evaluate both ongoing and new threats

- Action plans that take your business' individual needs and challenges into account

- Proven process that looks at multiple facets of security

In 2019, the overall cost of a security breach rose by 12%.

Clear-Cut and Reliable

- Trusted Microsoft security tools strategically implemented by our experts

- Best practices to help you properly implement security plans

- Fast, actionable results

Security Action Plans are typically available after 3 to 7 days.

Customized to Your Needs

- Tailored to fit your cloud-adoption strategy

- Prioritized to help get faster results based on your resources

- Assistance through all phases of implementation should you need it

Almost half of all data breaches are employee driven.

Vorsite has a top notch, first rate, technical staff who has a huge breadth and depth of knowledge. We are confident in Vorsite's ability to solve any problem."
