Sierra Systems

Move Data Anywhere with Sierra Systems' *Connect*

Imagine the business value you would achieve if every system in your enterprise was synchronized

Create workflows that collaborate on data between applications. Sierra Systems' Connect uses the Azure framework to move source data through a secure cloud, making it available for your other systems to utilize.

Self-sufficient, Sierra Systems' designed *Connect* to be easy-to-launch, and application agnostic. Sierra Systems can train your IT team to use the Microsoft Azure platform to synchronize source data from any application of thier choosing to any connected application.

Sierra Systems' Connect

Connect sits outside your applications, does not touch any source code. By only targeting data points, *Connect* insulates your workflows from application updates or modifications.

Case Study: Connect Microsoft Dynamics AX and CRM

Two of the most powerful tools in the Microsoft cloud can now be integrated to allow end-to-end commerce. *Connect's* "light touch" interface collects and shares data sources between AX and CRM systems.

New on-premise Microsoft Dynamics workflows connect AX and CRM customer information, sale data to create an automated, custom prospect-to-sale-to-shipping workflow, layering cloud technology with on-premise security.

As powerful as AX-CRM integration is, *Connect's* strength is its ability to replicate enterprise data through into additional applications via new workflows.

Design & Build the Most Efficient Workflow You Can

Initially designed to integrate Microsoft Dynamics AX & CRM, *Connect* is an Azure-based framework that moves source data, using minimal coding to share it with any other online or hybrid-connected system.

Sierra Connect allows your team to design workflows by moving data between connected applications.

Design Enterprise Workflows with *Connect*

Connect creates a pool of enterprise data, for a do-it-yourself data source-to-data source solution that can be configured to synchronize the applications your teams need to create their workflows.

The data is moved using Microsoft's Azure standards for security and pre-tested integrations. *Connect* uses these standards to let your team pick from many connection data points, and feed it into almost all standard Microsoft applications, often with bi-directional workflow capability.

Connect To Any Data Source

Oracle to Microsoft SQL
- Drastically cut integration time on migration projects with standard baseline data

Inventory to Warehouse
- Popular & custom applications can be integrated for automated notifications

Oracle	Cognos	Active D.	Axios	Google	Magento	Amazon	Salesforce
Azure	Power BI	SharePt.	Flow	DropBox	Workday	Infor	Adobe
AX	CRM	SQL	Excel	Teams	Tickers	JIRA	Mailchimp
Dynamics	F & O	Sales	Proj. Auto.	Cust. Ser.	Field Serv	Marketing	Office
Wordpress	Gmail	Twitter	Epic	Facebook	SAP	OneDrive	1,000s

Social Media to Microsoft Dynamics
- Reviews and reactions can feed sales reports and be matched to client profiles

Payroll to DropBox
- Updates become available to your team, clients or suppliers

Project Management to ERP to Finance to Project Management
- Modify budgets and update expectations based on the exact tracking of project tasks to burn-down schedules

Modify How Everyone Does Business

At the heart of Sierra Systems' services is our ability to optimize business workflows to work hand-in-hand with new technologies, and help clients adopt the new workflows into their enterprise. We can help you design and implement the business value your organization has been waiting for, opening the door to the next generation of how work gets done.

The Power of *Connect*

- **Unified**: Centralize integrations into one platform.

- **Simple**: Make the source and target systems agnostic to the data being integrated. No custom code needed!

- **Expandable**: Use the (ever growing) out-of-the-box platform and integration connections provided by Microsoft

- **Secure**: Track delivery of data packages with full error recovery and retry

Accelerating Businesses' IT

Sierra Systems' 50+ years of deep expertise in targeted industries has built our reputation of delivering superior solutions that strengthen organizations' performance.
